Thursday, 11th November, 1909.

This being the day on which Parliament is convoked by Proclamation (hereunto annexed), for the Despatch of Business, and the Members of the House being assembled.

PRAYERS.

Mr. Speaker communicated to the House the following letter which he had received:—

OFFICE OF THE GOVERNOR GENERAL'S SECRETARY, CANADA,
OTTAWA, 10th November, 1909.

SIR.—I have the honour to inform you that His Excellency the Governor General will proceed to the Senate Chamber to open the Session of the Dominion Parliament on Thursday, the Eleventh instant, at Three o'clock, p.m.

I have the honour to be, sir,
Your obedient servant,

J. HANBURY-WILLIAMS, Colonel,
Governor General's Secretary.

The Honourable,
The Speaker of the House of Commons.

A Message was delivered by Captain Ernest John Chambers, Gentleman Usher of the Black Rod:—

Mr. Speaker,

His Excellency the Governor General desires the immediate attendance of this Honourable House in the Senate Chamber.

Accordingly Mr. Speaker, with The House, went up to the Senate Chamber; and having returned,

Mr. Speaker informed the House, that he had received from the Hon. Mr. Justice Langelier and the Hon. Mr. Justice Jetté, two of the Judges selected for the trial of Election Petitions, pursuant to "The Dominion Controverted Elections Act" a Report relating to the election for the Electoral District of Lotbinière, and the same was read, as follows:—

LOTBINIERE CONTROVERTED ELECTION.

Canada,	}	<i>Superior Court.</i>
Province of Quebec,		
District of Quebec.		

"THE DOMINION CONTROVERTED ELECTIONS ACT."

To Honourable CHARLES MARCIL,
Speaker of the House of Commons of Canada.

Election for the Electoral District of Lotbinière,

BERGERON *et al*,

Petitioners;

and

FORTIER,

Defendant.

The undersigned, Judges of the Superior Court of the Province of Quebec, have the honour to make you the following report concerning the above-mentioned controverted election:—

The twenty-eighth of the present month, the day fixed for the trial of the petition in this case, we proceeded with the trial of the said petition. After the hearing of four witnesses, who had proved that practices of a nature to annul the defendant's election had been committed by his agents, without his knowledge, the attorney for the defendant declared that he did not desire to proceed any further with the case, and consented to the election being annulled, with costs against the defendant.

On the proof thus made before us and the declaration of the defendant's attorney, we have annulled the said election with costs against the defendant.

It has been alleged in the said petition that fraudulent practices had been committed by the elected Member, personally, as well as by his agents, but no proof was made that such practices had been committed by the defendant, personally, or by his agents, to his knowledge and with his consent.

It has been proved that fraudulent practices had been committed at the said election by François Blouin, Phileas Normand, Joseph Lefebvre, and Adolph Lefebvre, but it has not been proven that the said practices had been committed with the knowledge and with the consent of the defendant.

It has not been proved that fraudulent practices had been committed on a large scale at the said election, and we do not think that the investigation into the circum-

stances connected with the election was rendered incomplete by any action on the part of the parties to the petition nor that it is desirable that a more complete investigation should take place to discover if any fraudulent practices had been committed at that election.

We have the honour to send you with the present report copies of the depositions given during the trial of the said petition.

F. LANGELIER, *J.S.C.*
L. A. JETTE, *J.*

QUEBEC, 29th September, 1909.

The said Report was ordered to be entered on the Journals of this House.

Mr. Speaker also informed the House, that in conformity with Chapter 7, section 70, of the Revised Statutes, 1906, he had issued his Warrant to the Clerk of the Crown in Chancery to make out a new Writ of Election for the said Electoral District.

Mr. Speaker also informed the House, That he had received from the Judges selected for the trial of Election Petitions, pursuant to "The Dominion Controverted Elections Act," Certificates and Reports relating to the Elections—

For the Electoral District of Quebec Centre;
For the Electoral District of Quebec West;
For the Electoral District of Montmorency;

PETERBOROUGH WEST, CONTROVERTED ELECTION.

In the High Court of Justice for Ontario.

THE DOMINION CONTROVERTED ELECTIONS ACT AND AMENDING ACT.

Election of a Member for the House of Commons for the Electoral District of the West Riding of Peterborough, holden on the 19th and 26th days of October, A.D. 1908.

JOHN HAMPDEN BURNHAM,

Petitioner;

and

JAMES ROBERT STRATTON,

Respondent.

And (by cross-petition),

Between:

JAMES ROBERT STRATTON,

Petitioner;

and

JOHN HAMPDEN BURNHAM,

Respondent.

To the Honourable

The Speaker of the House of Commons of the Dominion of Canada:

We, the Honourable Hugh MacMahon and the Honourable James Magee, two of the Judges of the High Court of Justice for the Province of Ontario, do certify that on the 27th, 28th, 29th and 30th of September, and on the 1st and 2nd days of October, 1909, at the City of Peterborough, in the County of Peterborough, in the above-mentioned Electoral District, we held a court for the trial of the petitions between the said parties respecting the above election, at which the said James Robert Stratton had been returned as duly elected, and that upon hearing the evidence adduced for the respective parties and hearing counsel on their behalf, we found and determined that the Respondent, James Robert Stratton was duly elected and returned as Member of the House of Commons for the above-mentioned Electoral District, and that his election was valid and that the said petition should be and was dismissed; and by consent of counsel for both Complainant and Respondent, the same was dismissed without costs.

That no evidence was offered by counsel for the petitioner in the cross-petition, of the charges therein made, and the same was therefore dismissed; and by consent of counsel for both parties without costs.

And we report:—

(a) That no corrupt practice has been proved to have been committed by or with the knowledge or consent of either of the candidates at the said election.

(b) That the Petitioner had given notice in his particulars of 256 charges of corrupt practices at the said election, and a large number of witnesses were in attendance at the said trial, but evidence was given only in respect to twenty of the charges in the main petition, against James Robert Stratton, and no evidence was given in the cross-petition of James Robert Stratton against John Hampden Burnham on the charges of corrupt practices.

We are therefore unable to form any belief as to whether corrupt practices did or did not prevail at said election.

For the same reason we are of the opinion that the inquiry into the circumstances of the election was incomplete; but we are not of the opinion that it was rendered

incomplete by the action of any of the parties to the petition or cross-petition, or that further inquiry as to whether corrupt practices extensively prevailed is desirable.

As soon as the evidence taken at the trial is typewritten by the court stenographer it will be forwarded to you.

HUGH MacMAHON, *Rota Judge.*
JAMES MAGEE, *Rota Judge.*

OSGOODE HALL,
TORONTO, 6th October, 1909.

QUEBEC COUNTY CONTROVERTED ELECTION.

Canada, }
Province of Quebec, } *Superior Court.*
District of Quebec. }

To Honourable CHARLES MARCIL,
Speaker of the House of Commons of Canada.

"THE DOMINION CONTROVERTED ELECTIONS ACT."

No. 97.

PIERRE LORTIE *et al*,

Petitioners;

and

JOS. TURCOTTE,

Defendant.

We, Judges of the Superior Court of the Province of Quebec, have the honour to make the following report:—

On the fourth of the present month, the day fixed for the trial of the petition in this case, the said trial was adjourned to the eleventh of the present month. As the petition contained accusation of fraudulent practices against the defendants, as well as against his agents, the Court ordered petitioners to furnish the defendant, within two days, with the particulars of the said accusations.

On the eleventh of the present month, the day to which the trial of the said petition had been adjourned as aforesaid, the particulars which the Court had ordered the petitioners to furnish to the defendant not having been given, the defendant asked that the petition against him be dismissed with costs.

The attorney for the petitioners then asked for another adjournment stating that the person who was to have procured for him the desired particulars, although being in Court when the order to furnish them had been given, not having procured them, he was incapable of supplying them.

On this we dismissed the petition with costs.

No proof was made of the fraudulent practices alleged against the defendant in the petition and it was not proved that any fraudulent practices took place on a large scale at that election.

We are not of opinion that the investigation into the circumstances of the said election has been rendered incomplete by the action of any of the parties to the said petition, nor that a further investigation to discover if fraudulent practices on a large scale had taken place is desirable.

F. LANGEЛИER, *J.S.C.*
L. A. JETTE, *J.*

12th October, 1909.

And the said Certificates and Reports were ordered to be entered on the Journals of this House.

Honourable William Lyon Mackenzie King, C.M.G., Member for the Electoral District of North Waterloo; David A. Lafortune, Esquire, Member for the Electoral District of Montcalm; and James McCrie Douglas, Esquire, Member for the Electoral District of Strathcona, having previously taken the Oath according to Law, and subscribed before the Commissioners the Roll containing the same, took their seats in the House.

Ordered, That Sir Wilfrid Laurier have leave to bring in a Bill respecting the Administration of Oaths of Office.

He accordingly presented the said Bill to the House, and same was received and read the first time.

Mr. Speaker reported, That when The House did attend His Excellency the Governor General, this day in the Senate Chamber, His Excellency was pleased to make a Speech to both Houses of Parliament of which Mr. Speaker said he had, to prevent mistakes, obtained a copy, which he read to The House, as followeth:—

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

In again meeting you at a season most convenient for the despatch of business, it is with great pleasure that I congratulate you on the prosperous condition of the country.

The present year, which is now rapidly drawing to a close, has been a period of steady and progressive growth. Immigration has poured into the new settlements of the north and of the west in a copious and well ordered stream, drawn from the best elements of the British Isles, the United States and Continental Europe. Trade and commerce have made rapid advances in all directions. The revenue has almost com-

pletely regained what it had lost in the recent period of depression. Most remarkable has been the rapid recovery from the financial embarrassment which for a short time was the cause of anxiety amongst business men. In nearly every branch of business there has been a revival of activity which gives assurance of continued progress and prosperity.

Two Members of my Government attended the Imperial Conference called by His Majesty's Government, on the question of defence. A plan was adopted after consultation with the Admiralty, for the organization of a Canadian Naval Service, on the lines of the Resolution of the House of Commons of the 29th of March last. The papers will be immediately brought down and a Bill introduced accordingly.

The new Convention between His Majesty and the President of the French Republic, respecting the commercial relations between France and Canada, having been approved by the French Legislative Chambers, you will also be asked to confirm it.

The construction of the Transcontinental Railway has made substantial advance during the year. The western division has been extended 66 miles beyond Edmonton, completing a total distance of 861 miles west of Winnipeg. Contracts have been let for 399 miles in the Mountain division; good progress was made on this work. The Eastern division is now open for traffic from Winnipeg to Lake Superior Junction, and thence, by the Grand Trunk Pacific branch, to the lake itself. The whole of the work between Winnipeg and Moncton is now under contract.

The board of engineers entrusted with the preparation of plans for the reconstruction of the Quebec bridge has sufficiently advanced its work to permit of tenders being invited for the substructure.

The exploratory surveys for a railway from the western wheat fields to Hudson's Bay were pushed energetically during the whole of last summer. It is hoped that a report of the operations will be placed before you at an early date.

In order to improve the facilities already afforded the public by the Government railways, and to enhance their value as part of the great transportation system of Canada, a Bill will be submitted to you for the purpose of enabling the Minister of Railways, on the recommendation of the Government Railways Managing Board, and subject to the approval of Parliament, to lease any line or lines connecting with the Intercolonial Railway.

A measure will be submitted to you for the purpose of rendering more effective the present legislation respecting combinations which unduly enhance prices.

Bills will also be introduced respecting banks and banking, insurance, navigable waters, and other matters.

Gentlemen of the House of Commons:

The accounts of the last year will be laid before you.

The estimates for the coming fiscal year will be submitted for your approval at an early date.

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

I pray the Almighty Lord that He may guide and bless your deliberations, and that they may bear fruit in a further increase of our country's prosperity and well-being.

On motion of Sir Wilfrid Laurier, seconded by Mr. Fielding,

Resolved, That the Speech of His Excellency the Governor General to both Houses of Parliament of the Dominion of Canada, be taken into consideration on Monday next.

On motion of Sir Wilfrid Laurier, seconded by Mr. Fielding,

Resolved, That a Special Committee be appointed to prepare and report, with all convenient speed, Lists of Members to compose the Select Standing Committees of this House, under Rule 10, said Committee to be composed of Sir Wilfrid Laurier, and Messieurs Borden, Paterson, Fielding, Haggart (Lanark), Pardee and Taylor (Leeds), and that that portion of Rule 10, limiting the number of members of the said Committee, be suspended in relation thereto.

Mr. Speaker laid before the House,—The Report of the Joint Librarians of Parliament, which is as follows:—

REPORT OF THE LIBRARIANS FOR THE YEAR 1908-9.

To the House of Commons—

The Joint Librarians of Parliament have the honour to present their report for the year 1908-9.

The latest revised laws of many of the American States have been procured; and by process of exchange, the revised laws of most of the Colonial dependencies have been obtained. There is probably no part of the Empire unrepresented on our shelves.

The discussions on the question of defence have been followed during the recess; and Members will find in the card catalogues references to many authorities, articles, reports of speeches, &c.

During the recess efforts have been made to procure shelf room for the current official publications of the Federal and Provincial Governments.

Having, during several years, called the attention of Parliament to the necessity for providing additional space in the Library, the Librarians have only to add to former representations, the statement that the necessity grows each year more pressing. It will be hardly just to hold the Librarians responsible for delays and confusion which they have endeavoured to prevent, but which can hardly be longer avoided. The plans for an extension of the Library prepared by the Chief Architect and submitted several times to Parliament, promised a satisfactory addition to the shelf-space; but no steps have been taken to carry these plans into execution.

The binding of newspapers has become especially a source of trouble. The number of papers to be bound has increased beyond what seems reasonable, and the size of the principal journals has increased in many cases four-fold thus increasing the expense of binding, as well as requiring more space. On the other hand, the increase in the number of Provinces and in the numbers of representatives, and the multiplication of centres of publication, make an increase in the number of periodicals, bound for preservation, inevitable.

Among the important additions which have been made to the section of American History, we may mention: "Sketches of North America and the Oregon Territory," by Capt. H. Warre, A.D.C. to Sir R. D. Jackson, late Commander of the Forces. Folio beautifully illustrated, with views of Vancouver, Fort Garry, &c. London 1846. Also "A Catalogue of Books relating to the Discovery and Early History of North and South America," forming part of the Library of E. D. Church, Esq., N.Y.; 5 vols., 4 to 1909. This catalogue gives fac-similes of Title pages and an accurate description of all the Books mentioned in it, and is consequently very valuable to the purchaser of Rare Americana.

In connection with this subject, it may be mentioned here that the Librarians have been able to secure a large number of copies of old newspapers. This has enabled them to complete several series of the same, or replace bound copies which have been borrowed and lost.

During the past few years, the literary and historical annals of England and France have received, in unusually large numbers, most interesting contributions in

the form of *Memoirs, Souvenirs and Correspondence*. The Librarians have acquired copies of these precious collections, so important and so interesting from an historical point of view.

The card catalogue begun several years ago, has been continued during recess.

An extract of the Quebec Law catalogue, giving the titles of all the Codes of the Province of Quebec, commentaries with law periodicals bearing on the same, will be found annexed to the annual supplement.

The Transactions of the numerous Historical Societies of Canada and the United States have been kept up to date, as much as possible. The value of the documents which they contain cannot be overestimated by the student of American History.

Among the valuable additions to the legal side of the Library may be mentioned the "Legislation of the Empire, 1898-1907," which is the result of the labours of the Society of comparative legislation, and will be found valuable by all who seek to know the laws of the remoter regions of the Empire.

A list of the English, French and American periodicals preserved in the Library is appended to the annual list of accessions.

The Statistics of the Library are, as usual, appended hereto.

The usual list of donations is also appended.

The Annual Catalogue is on print and will be distributed at an early day.

All of which is respectfully submitted.

We, the undersigned William Wilfrid Sullivan, Chief Justice of the Supreme Court of Judicature of the Province of Prince Edward Island, and Rowan Robert Fitzgerald, a Judge of the said Court, do hereby certify that pursuant to “Dominion Controverted Elections Act,” on the 28th, 29th and 30th days of September, A.D., 1909, we held a court at Georgetown, within the said Electoral District of King's County, for the trial of the said election petition between the above-named parties respecting the above-mentioned election, at which election the said Austin L. Fraser had been returned as duly elected, and that upon hearing the evidence adduced and what was alleged by counsel for the parties, we determined and adjudged:—

That the said Austin L. Fraser was duly elected and returned at said election as a Member of the House of Commons of Canada, for the said Electoral District of Kings County, and we dismissed the said petition with costs.

We hereby certify and report:—

That no corrupt practice has been proved to have been committed by or with the knowledge and consent of any candidate at the said election.

That we have reason to believe that corrupt practices somewhat extensively prevailed at the said election.

That we are of opinion that the inquiry into the circumstances of the election has been rendered incomplete by the action of the parties to the petition and that further inquiry as to whether corrupt practices have extensively prevailed is desirable.

We herewith append a copy of the notes of evidence taken at the said trial.

3rd Division, Sub-Division A.

A. Lemay 50

Mr. SPEAKER:—A question arose on Thursday last at the time of Introduction of Bills, as to the proper application of Rule 48. This Rule reads as follows:—

“No Bill relating to trade, or the alteration of the laws relating to trade, is to be brought into this House, until the proposition shall have been first considered in a Committee of the Whole House, and agreed unto by the House.”

The Bill introduced by the Honourable Member for Sincoe (Mr. Currie), intituled: “An Act to amend the Inspection and Sale Act,” in my opinion, clearly comes within the terms of the Rule and should first be considered in Committee of the Whole House, as provided by the said Rule. This Bill not only relates to trade, but deals directly with trade, and provides for certain inspection and other regulations applicable to a particular trade.

Incidental to the brief discussion on the above matter, the question was raised as to whether the Bill No. 40, intituled: “An Act to amend the Inspection and Sale Act,” introduced by the Honourable the Minister of Agriculture, on the 25th November, should not also have been first considered in Committee of the Whole House under the said Rule. In reference to this Bill, I may say that both the Clerk of the House and the Law Clerk advised the Honourable Minister, after looking into this Bill and considering the precedents referred to in Bourinot's Parliamentary Practice, that such a resolution was not necessary. The precedents in support of this position I find on page 635 of Bourinot's Parliamentary Practice. In looking into these it appears that on former occasions, in several instances, Bills of that nature have been allowed to pass the House without previous action by resolution; but these, in my opinion, do not constitute such a precedent as would warrant me in varying from the strict letter of the Rule; the cases referred to do not appear to have been the subject of discussion, or of any specific ruling on the part of the Speaker at the time.

I, therefore, recommend that in regard to that Bill (No. 40), the same stand until a resolution has been duly considered and approved.

Sir Wilfrid Laurier, a Member of the King's Privy Council, laid before the House by command of His Excellency the Governor General.—Report of the Department of Trade and Commerce, for the fiscal year ended 31st March, 1909, Part III.—Canadian Trade with Foreign Countries (except France, Germany, the United Kingdom and United States). 17,600 of each to Members of Parliament; 800 copies of his own evidence to each member of the said official staff, 1,500 copies to the Department of Agriculture, and 100 copies of each to the use of your Committee.

MR. SPEAKER:—The Honourable Member for Portage la Prairie (Mr. Meighen) yesterday (December 1st), called my attention, as a matter of privilege, to the position of another Honourable Member of this House who had been returned for two Constituencies and had not yet declared or elected for which of the two Constituencies he would continue to retain his seat.

The contention was made that a certain Sessional order of the House of Commons of Great Britain, requiring a Member under such circumstances, if within one week that it should be made to appear that there was no question as to his return, &c., was applicable to the case referred to, inasmuch as such a case was not provided for by the Rules and Orders of this House. Rule No. 1 of this House is as follows:—

“In all cases not provided for hereinafter or by Sessional or other Orders, the rules, usages and forms of proceedings of the House of Commons of the United Kingdom of Great Britain and Ireland, in force on the first day of July, 1867, shall be followed.”

In the Imperial Parliament the matter under consideration is dealt with by Sessional Orders, which are renewed by the House of Commons from Session to Session and which expire at prorogation.

The Sessional Order on the subject which was, presumably, passed by the Imperial House in 1867, may or may not have been in force on the first day of July in that year, depending on whether the House was in Session or had been prorogued before that date. Even if that Sessional Order was in force on the first day of July, 1867, the question as to whether that Order, in all its terms, is applicable to the House of Commons of Canada is one of importance and not without difficulty. As far as I have been able to ascertain in the limited time allowed me since the question was raised, I have not been able to find that it has been observed in this country. In fact, from a somewhat hasty consideration of the precedents, I think I would be safe in saying that the practice of this House, as to the time in which the Member's choice shall be made, has been far from uniform, and to the present time no formal ruling on the subject has been made in this House.

The question is, are such Sessional Orders as are annually passed by the British House of Commons at the beginning of each Session, included in the meaning of the words “rules, usages and forms of proceeding” mentioned in Rule 1 of this House. Those Sessional Orders are clearly neither rules nor forms of proceeding, nor, in the strictest meaning of the term, are they to be considered “usages,” and, consequently, are not applicable to this House in cases not specifically provided for. The practice of this House has so far not recognized them as binding.

In 1873, Hon. Mr. Blake, having been elected for Durham and Bruce, announced his choice of Constituency fifteen days after the beginning of the Session, and, in 1896, Mr. Dalton McCarthy elected which of two seats (Brandon and Simcoe) he would sit for, on the seventh day after the opening of the Session. The case of the Honourable the present Postmaster General, returned for both Nicolet and Gaspé, in 1904, is one of the latest in point. He only resigned for Nicolet on the third of December, 1906, and, after some fifteen months had elapsed, during which he might have exercised his privilege of choice. No doubt a search of the Journals and Records would show many similar cases.

A strict adherence to the British rule, would, therefore, to a certain extent, form an alteration in the customs and usages of this House in that regard.

My ruling is, therefore, that there is nothing in the Rules of this House requiring a Member who has been returned for more than one Constituency, to elect within any prescribed time, for which of such constituencies he will sit. But, in my opinion, it is eminently desirable that some definite rule and practice on the subject should be established. The House has a Standing Committee for the purpose of considering such questions—the Committee on Privileges and Elections—and I would suggest that at an early date the matter should be considered by the House, or by the Committee, with a view to the fixing of a definite period within which such election is to be made.

The Order of the Day being read for the second reading of the Bill to amend the Criminal Code.

Mr. Miller moved, seconded by Mr. Stratton, That the Bill be now read a second time.

And the Question being put on the said Motion:—it was resolved in the affirmative.

Ordered, That the Bill be now read a second time.

The Bill was accordingly read the second time.

Mr. McCall moved, seconded by Mr. Black, That the said Bill be referred to a Special Committee composed of Messieurs Miller, Bristol, Macdonell, Monk, Gervais, Barker, German, Lalor, Harris, Clarke (Essex), Haggart (Winnipeg), Campbell, Neely, Barnard, Macdonald and McCall, with power to report thereon.

Sir Wilfrid Laurier moved, in amendment thereto, seconded by Mr. Fielding, That all the names in the proposed motion be struck out, and the following names substituted therefor: “Miller, McColl (Northumberland), Monk, Blain, Sinclair, Stratton and Martin (Regina).

And the question being put on the amendment;

It was resolved in the affirmative.

And the Question being put on the main Motion, so amended, it was resolved in the affirmative.

Mr. Speaker acquainted the House, That a Message had been brought from the Senate by their Clerk, as followeth:—

The Senate have passed the Bill, intituled: “An Act respecting a certain Supplementary Convention between His Majesty and the President of the French Republic,” without any amendment.

And then The House, having continued to sit till Eleven of the Clock, P.M., adjourned till To-morrow.

Sir Wilfrid Laurier, a Member of the King's Privy Council, delivered to Mr. Speaker a Message from His Excellency the Governor General, signed by His Excellency.

And the said Message was read by Mr. Speaker (all the Members of the House standing and being uncovered), and is as followeth:—

GREY.

Gentlemen of the House of Commons:

I have received with great pleasure the Address which you have adopted in reply to my Speech at the opening of the Session of Parliament, and thank you for it sincerely.

GOVERNMENT HOUSE,

OTTAWA, 15th December, 1909.

Mr. Brodeur, a Member of the King's Privy Council, laid before the House,—Return made to Parliament, in accordance with Chapter 47, Section 4, Revised Statutes, 1906, containing copy of the Orders in Council for the issue of licenses to United States fishing vessels to enable them to buy bait, ice, lines, &c., during the year 1910. (*Sessional Papers, No. 64.*)

RULING OF MR. SPEAKER ON A POINT OF ORDER RELATIVE TO A QUESTION.

MR. SPEAKER:—The Hon. Member for Jacques Cartier (Mr. Monk) yesterday raised a question of Order, with reference to the answer by the Hon. the Minister of Militia and Defence to Question No. 10 on the Order Paper.

The answer given to the said question, in my opinion, did, in some measure, contravene the rules and practice of the House in that regard, but, as the Honourable Minister stated, the answers were drawn from him in that form in consequence of irregularities in the form of the question.

In my opinion the question, as put by the Hon. Member for Sherbrooke, was, in several particulars, irregular, inasmuch as it contravened the provisions of Rule 36, a portion of which Rule reads as follows:—"in putting any such question or in replying to the same no argument or opinion is to be offered, nor any facts stated, except so far as may be necessary to explain the same, and, in answering any such question, the matter to which the same refers shall not be debated." Comments upon this Rule will be found in Bourinot's Parliamentary Practices, pp. 433 to 435. Among the comments made in that work, as to the form in which questions may be put, I would quote the following:—

(a) "A question has been refused a reply because it referred to a matter of opinion." (b) "A question should be simply and severely accurate in its allegations." "If it is hypothetical it is objectionable and should not be answered." (c) "It should not be ironical or convey any imputation."

Members are reminded that it is the duty of certain officers of the House to point out to a Member when any question is put in improper form, and to communicate with the Member, in order that the notice may be properly amended. Occasionally irregularity in questions are not noted by the officers of the House, but in this respect instructions will be given to be more particular in future in this regard.

Mr. Speaker informed The House, That the Clerk had laid on the Table the Fourteenth Report of the Examiner of Petitions, which was read, as followeth:—

Pursuant to Rule 95, Section 2, the Examiner of Petitions for Private Bills, has the honour to present the following as his Fourteenth Report:—

Mr. Macdonell, from his place in the House, asked leave to move the adjournment of the House for the purpose of discussing a definite matter of urgent public importance, and stated the subject to be "the recent loss of the Railway Ferry *Bessemer, No. 2*, on Lake Erie, off Port Stanley, in which at least 38 lives are known to have been lost."

He then handed a written statement of the matter proposed to be discussed to Mr. Speaker, who having read it to the House, put the question: Has the Member leave to proceed?

Objection being taken;

Mr. Speaker requests those Members who support the motion to rise in their places; more than 20 Members having supported the motion, Mr. Speaker accordingly called upon the Member to propose his motion.

Mr. Macdonell then moved, seconded by Mr. Wallace, That the House do now adjourn.

And a Debate arising thereupon, and the Question being put on the Motion: It passed in the Negative.

The House then resumed the adjourned Debate on the proposed motion of Mr. Fielding: That Mr. Speaker do now leave the Chair for the House to go again into Committee of Ways and Means.

Ruling of Mr. Speaker *re* Bill intituled: "An Act to amend the Dominion Lands Act."

Mr. SPEAKER,—On December 17th last the Hon. Member for Assiniboia (Mr. Turriff), asked leave to introduce this Bill. An objection was raised, on a point of order, that the Bill should have been first considered by a Committee of the Whole before its introduction, on the ground that Rule 77 applied to the case.

Rule 77 provides that if any motion be made in the House for any public aid or charge upon the people, the consideration and debate thereof may not be presently entered upon, but shall be adjourned to a future day; and should be referred to a Committee of the whole House, before any vote do pass thereon.

Not having had an opportunity of perusing the Bill, at the time the objection was taken, the Bill was allowed to stand in order that this point might be considered.

I have looked carefully through the Bill, which contains two clauses, the first of which provides that "An entrant for a purchased homestead may, within six months after the date of entry, abandon such homestead and make a second entry, and shall receive credit for the amount of principal paid on the first entry." The second clause is substantially the same as far as the principle of Rule 77 is concerned.

I do not find here that any public aid or charge upon the people is provided for. The proposed Act simply provides that an entrant may abandon one lot of land to the Government and take up another, in lieu thereof, his cash payment to the Government simply remaining to his credit on account of the second lot applied for. This is no charge upon the revenues of the country; nor can the substitution of one parcel of land for another be held to be equivalent to a charge or tax.

Therefore, I think, the Hon. Member may introduce his Bill without reference to a Committee of the whole House.

Ordered, That Mr. Turriff have leave to bring in a Bill to amend the Dominion Lands Act.

He accordingly presented the said Bill to the House and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

Ordered, That Sir Wilfrid Laurier have leave to bring in a Bill respecting the Naval Service of Canada.

He accordingly presented the said Bill to the House and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

Mr. Monk moved, seconded by Mr. Blain, That an Order of the House do issue to the proper Officer for a return, showing the number of cases, en délibéré, or in which judgment has been reserved, before the Superior Court of Lower Canada or the Judges thereof, sitting in and for the District of Montreal, said return to be confined to the cases of said Court heard in the City of Montreal, and to such as were en délibéré, or reserved, on the first day of December, instant.

And a Debate arising thereupon, on motion of Mr. Aylesworth, seconded by Mr. Murphy,

Ordered, That the said Debate be adjourned.

At Six o'Clock, P.M., Mr. Speaker declared the House adjourned till To-morrow, at Three of the Clock, P.M.

RELATIVE TO PROCEDURE ON QUESTIONS.

MR. SPEAKER:—In regard to Question No. 4 (which appeared in the Orders of the Day of yesterday, as Question No. 24), in the name of Mr. Barnard, I desire to make the following observations:—

In my opinion, there are only two ways in which a question can be properly withdrawn, when once it has been presented for answer in the House; that is, first by written notice by the Member putting the question, to the Clerk of the House, stating that the question is withdrawn, or by the Member, in his place in the House, informing the Speaker that he desired the question to be dropped or withdrawn.

In the British House of Commons the practice is that no Member can ask a question, in the name of another Member, unless upon the request of the Member in whose name the question stands. (May, 11th, Edit., p. 251). The practice, however, in this House has hitherto not been so rigid as this, inasmuch as Members have asked questions for other Members, under the assumption of an implied request, at least, and, in my opinion, it is not desirable that this practice should be changed.

On the subject of answers to questions, the following is the practice of the British House:—

["See May, 251.—A Minister may, if he thinks fit, on the ground of public interest, answer a question appearing on the notice paper, although it is not asked. A Minister may, also, on the ground of public interest, or some other ground, decline to answer a question."

Having this practice in view, I think the Honourable Minister would be at liberty to answer the question of the Honourable Member, even although the Member did not call the same.

The Order of the Day being read for resuming the adjourned Debate on the Questions which was, on Tuesday, the 14th December last proposed, that Mr. Speaker do now leave the Chair for the House to go into Committee, to consider of the Ways and Means for raising the Supply to be granted to His Majesty.

And the Question being again proposed:—The House resumed the said adjourned Debate.

And the Debate continuing,

On motion of Mr. Clark (Red Deer), seconded by Mr. Currie (Simcoe),

Ordered, That the said Debate be adjourned.

And then The House, having continued to sit till three minutes after Eleven of the Clock, P.M., adjourned till To-morrow.

Friday, 14th January, 1910.

Mr. Lancaster moved, seconded by Mr. Armstrong,

That an humble Address be presented to His Most Gracious Majesty the King, as follows:—

MOST GRACIOUS MAJESTY:

We, your Majesty's dutiful and loyal subjects, the Commons of Canada, in Parliament assembled, beg leave most respectfully to represent—

That in the year 1867 by Act of your Imperial Parliament, commonly known as the British North America Act, the then existing provinces of Canada, Nova Scotia and New Brunswick were federally united and formed into one Dominion under the name of Canada, and the constitution of the legislative authority of such Dominion provided for and the nature of its executive government declared, and, since the said Act, other provinces in British North America have also been federally united to the said Dominion and now form part thereof, with representation in this House of Commons, pursuant to the provisions providing therefor in the said British North America Act and amending, and other, Acts subsequently enacted;

That by the said British North America Act the executive government and authority of and over Canada is declared to continue and be vested in Your Majesty and Your Heirs and Successors, Kings and Queens of the United Kingdom of Great Britain and Ireland, and Your Majesty is represented in Canada by a Governor General;

That by the said British North America Act there is also a council to aid and advise Your Majesty, styled the King's Privy Council for Canada, the Members of which council are from time to time chosen and summoned by Your Majesty's said Governor General, and may be from time to time removed by the said Governor General;

That by the said British North America Act the Parliament of Canada consists of Your Majesty, an upper House, styled the Senate and the House of Commons, but with powers not to exceed those, at the passing of the said Act, held and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland;

That by the said British North America Act it is also provided that Bills for appropriating any part of the public revenue or for imposing any tax or impost, shall originate in the House of Commons, and that no such Bill or vote, resolution or address for such appropriation or tax or impost, shall be adopted or passed that has not been first recommended to that House by message of Your Majesty's said Governor General, in the Session in which such Bill, vote, resolution or address is proposed;

That by the said British North America Act it is also provided that where any Bill passed by the House of Parliament is presented to Your Majesty's said Governor General, for Your Majesty's assent, he shall declare according to his discretion but subject to the provisions of the said Act and to Your Majesty's instructions, either that he assents thereto, in Your Majesty's name, or that he withholds Your Majesty's assent, or that he reserves the Bill for the signification of Your Majesty's pleasure, and that where he assents to a Bill, in Your Majesty's name, if Your Majesty in Council, within two years after receipt thereof by the Secretary of State, thinks fit to disallow the Act such disallowance shall annul the Act, and that a Bill reserved for the signification of Your Majesty's pleasure shall not have any force unless and until within two years from the day on which it was presented to Your Majesty's said Governor General, for Your Majesty's assent, he signifies to the Houses of Parliament or by proclamation that he has received the assent of Your Majesty in Council;

That by the said British North America Act legislatures for the various provinces, constituting the said Dominion of Canada, are also established, each governed by a Lieutenant Governor, appointed by Your Majesty's said Governor General in Council for five years, and whose salaries are required to be fixed and provided by the Parliament of the Dominion of Canada and such Provincial Legislatures are empowered exclusively to make laws in relation to a large number of matters and subjects of great importance, subject to disallowance by Your Majesty's said Governor General in Council, within one year, but not in any way subject to consent also by the said Senate;

That in regard to all matters and subjects, not within the said exclusive power of

the said Provincial Legislatures, it is provided by the said British North America Act that all laws to be made by the said Parliament of Canada must be consented to and passed by both the Senate and the House of Commons, before being presented to Your Majesty's said Governor General for assent, and the Members constituting the said Senate are appointed for life and not subject to election or rejection by the people, and the Members of the House of Commons are elected by the people every five years or at any less period at which Your Majesty's said Governor General may dissolve the Parliament;

That during the forty years since the said British North America Act has been in force much dissatisfaction has been caused from time to time to Your Majesty's loyal subjects in Canada by the actions of the Senate in regard to matters dealt with by the House of Commons, and the rejection of laws sought to be made by the people, through their representatives in the House of Commons and passed by the House, and, by reason of the heavy expense and burden of taxation placed upon the people to provide for the maintenance of that two-fold system of dealing with the making of laws by the Parliament of Canada;

That in view of the many other provisions heretofore referred to for guarding against and disallowing any ill-advised or improper legislation which might by any possibility pass the said House of Commons, and of the aforesaid dissatisfaction of the people and heavy burden of expense involved and of the great advance made in education by the whole people of Canada, since the passing of the said British North America Act, this House is of the opinion that the Senate is no longer required or advisable for the properly carrying on of responsible government in Canada, or safeguarding of Your Majesty's full Rights and Prerogatives; and that the abolition of the said Senate would greatly conduce to the welfare of the Dominion of Canada and promote the interests of the British Empire.

We, therefore, respectfully pray that the said British North America Act be so amended as to provide for the abolition of the said Senate.

And the Question being put on the said Motion, The House divided; and the names being called for, they were taken down, as follow:—

So it passed in the Negative.

Mr. Taylor (New Westminster) moved, seconded by Mr. Goodeve, That whereas, it is provided by the British North America Act, Section 22, that in relation to the constitution of the Senate, Canada shall be deemed to consist of three divisions, viz., Ontario, Quebec and the Maritime Provinces, which shall be equally represented by twenty-four Senators for each division;

And whereas, there is no provision for the creation of additional equal divisions upon the admission or constitution of other Provinces, and, the Provinces west of Ontario, have, at present, representation by only fifteen Senators, although in population, size, contribution to the revenue and representation in the Commons, they have attained importance calling for treatment as an equal division;

This House is of the opinion that provision should be made for immediate augmentation of the representation of the Western Provinces in the Senate, by increasing said representation to six members each for British Columbia, Alberta, Saskatchewan and Manitoba, respectively; and for such further readjustment of the representation of the Western Provinces, in the Senate, as may from time to time be called for by reason of development in population and importance of interests.

Pursuant to Rule 95, Section 2, the Examiner of Petitions for Private Bills has the honour to present the following as his Twenty-second Report:—

Your Examiner has duly examined the following Petitions for Private Bills, and finds that all the requirements of the 90th Rule have been complied with in each case, viz.:—

Of Frank S. Cahill and others, for an Act of Incorporation under the name of the Saskatchewan Central Railway Company.

Of the Bay of Quinté Railway Company, for an Act authorizing them to construct a branch line of railway.

Of the Hamilton, Waterloo and Guelph Railway Company, for power to increase their capital stock.

Of E. Mahon and others, for an Act of Incorporation under the name of the Burrard Inlet Tunnel and Bridge Company; and

Of George A. Graham and others, for an Act of Incorporation under the name of the International Waterways Canal Company.

The Clerk laid on the Table the following Private Bills:—

Bill to incorporate the Burrard Inlet Tunnel and Bridge Company.

Bill to incorporate the International Waterways, Canal and Construction Company.

Bill respecting the Royal Guardians; and

Bill to incorporate the Saskatchewan Central Railway Company.

The said Bills were read the first time, and ordered for a second reading at the next sitting of the House, pursuant to Rule 98.

Mr. Guthrie, from the Select Standing Committee on Railways, Canals and Telegraph Lines, presented to the House the Fifth Report of the said Committee, which is as follows:—

Your Committee have had under consideration the following Bills, and have agreed to report the same with Amendments, viz.:—

Bill respecting the Manitoba and Northwestern Railway Company of Canada; and

Bill respecting the Vancouver and Coast-Kootenay Railway Company.

Ordered, That Mr. Staples have leave to bring in a Bill to amend the Interest Act.

He accordingly presented the said Bill to the House, and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

Sir Wilfrid Laurier moved, seconded by Mr. Graham, That whereas it appears by a return made to the House, during the present Session, being Sessional Paper 42*a*, that Mr. Hugh D. Lumsden, late Chief Engineer of the National Transcontinental Railway, in a letter dated 25th June, 1909, addressed to the Commissioners, resigning his position as such Chief Engineer, uses the following language: "In view of the general disregard of my instructions, and having lost confidence in the Engineering staff, I have concluded to resign my position as Chief Engineer"; and in a second letter dated 26th June, 1909, addressed to the Commissioners, the said Hugh D. Lumsden writes as follows: "Referring to my letter of yesterday, wherein I stated that I have lost confidence in the Engineering staff, I beg to state that this does not apply to the whole staff, but applies only to a portion of the staff, who were responsible for the measurement, classification, supervision and inspection of considerable portions in District 'B' and east of Rennie Crossing, in District 'F,' lately gone over by me."

And whereas, while this House deems it not desirable to take any action which might prejudice the position of either of the parties to the arbitration proceedings, now in progress between the Grand Trunk Pacific Railway Company and the said Commissioners, yet the said recited allegations of said Hugh D. Lumsden, stated by him as the reason for his resignation of the said position of Chief Engineer, are, in the opinion of this House, of such great public interest and involve such grave charges against a portion of the engineering staff of the Transcontinental Railway, as to make it desirable that the same should be investigated by a Committee of this House;

Therefore, it is resolved, That a Special Committee of five Members of the House, to be named hereafter, be appointed to investigate the said charges and allegations of the said Hugh D. Lumsden against a portion of the said engineering staff of the said railway; that such Committee have power to send for persons, papers and records, to examine persons on oath or affirmation, and to report from time to time.

Mr. Lennox moved, in amendment thereto, seconded by Mr. Northrup, that all the words after the word "That", in the proposed motion, be omitted, and the following substituted therefor:

"Hugh D. Lumsden, in tendering his resignation as Chief Engineer of the National Transcontinental Railway, has made grave charges touching the expenditure of public moneys in the construction of the said Railway, which charges ought, in the public interest, to be thoroughly investigated.

"And whereas the cost of the Eastern Division of the said Railway, according to the latest estimates of the Government, will be so enormously in excess of the estimates submitted to Parliament in 1904 and 1905, as to arouse the most serious alarm and to call for the fullest inquiry.

"Therefore be it resolved that a committee of seven Members be appointed to investigate the said charges and all others matters connected with, or relating to, the construction of the Eastern Division of the said Railway and the expenditure of public moneys thereon.

"That the said Committee shall have power to send for persons, papers and records, to examine witnesses on oath or affirmation and to report from time to time."

Ordered, That the evidence being taken before the Select Standing Committee on Public Accounts, on the investigation of certain Dredging Contracts in the Province of New Brunswick, be printed from day to day.

Ordered That Mr. Oliver have leave to bring in a Bill to amend the Land Titles Act.

He accordingly presented the said Bill to the House, and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

Ordered, That Mr. Fielding have leave to bring in a Bill to correct a clerical error in the French Convention Act, 1908.

He accordingly presented the said Bill to the House, and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

On motion of Mr. King, seconded by Mr. Lemieux,

Resolved, That the House do go into Committee of the Whole, on Friday next, to consider a Bill now before this House respecting the investigation of Combines, Monopolies, Trusts and Mergers, &c.

Mr. King, a Member of the King's Privy Council, then acquainted The House, That His Excellency the Governor General, having been informed of the subject-matter of the said proposed Resolution, recommends it to the consideration of the House.

The House, according to Order, resumed the adjourned Debate on the proposed motion of Sir Wilfrid Laurier, That whereas it appears by a return made to this House during the present Session, being Sessional Paper 42a, that Mr. Hugh D. Lumsden, late Chief Engineer of the National Transcontinental Railway, in a letter dated 25th June, 1909, addressed to the Commissioners, resigning his position as such Chief Engineer, uses the following language: "In view of the general disregard of my instructions, and having lost confidence in the Engineering staff, I have concluded to resign my position as Chief Engineer"; and, in a second letter, dated 26th June, 1909, addressed to the Commissioners, the said Hugh D. Lumsden writes as follows: "Referring to my letter of yesterday, wherein I stated that I have lost confidence in the Engineering staff, I beg to state that this does not apply to the whole staff, but applies only to a portion of the staff, who were responsible for the measurement, classification,

supervision and inspection of considerable portions in District 'B' and east of Rennie Crossing, in District 'F,' lately gone over by me."

And whereas, while this House deems it not desirable to take any action which might prejudice the position of either of the parties to the arbitration proceedings, now in progress between the Grand Trunk Pacific Railway Company and the said Commissioners, yet the said recited allegations of said Hugh D. Lumsden, stated by him as the reasons for his resignation of the said position of Chief Engineer, are, in the opinion of this House, of such great public interest and involve such grave charges against a portion of the engineering staff of the Transcontinental Railway, as to make it desirable that the same should be investigated by a Committee of this House;

Therefore, it is resolved, That a Special Committee of five Members of the House, to be named hereafter, be appointed to investigate the said charges and allegations of the said Hugh D. Lumsden against a portion of the said engineering staff of the said railway; that such Committee have power to send for persons, papers and records, to examine persons on oath or affirmation, and to report from time to time,

And the proposed amendment of Mr. Lennox thereto, That all the words after the word "That" in the proposed motion be omitted and the following substituted therefor:

"Hugh D. Lumsden, in tendering his resignation as Chief Engineer of the National Transcontinental Railway, has made grave charges touching the expenditure of public moneys in the construction of the said Railway, which charges ought, in the public interest, to be thoroughly investigated.

"And whereas the cost of the Eastern Division of the said Railway, according to the latest estimates of the Government, will be so enormously in excess of the estimates submitted to Parliament in 1904 and 1905, as to arouse the most serious alarm and to call for the fullest inquiry.

Therefore be it resolved that a committee of seven Members be appointed to investigate the said charges and all other matters connected with, or relating to, the construction of the Eastern Division of the said Railway and the expenditure of public moneys thereon.

"That the said Committee shall have power to send for persons, papers and records, to examine witnesses on oath or affirmation and to report from time to time."

And the Debate continuing;

And The House, having continued to sit till after Twelve of the Clock, on Friday morning.

Friday, 28th January, 1910.

And the Question being put on the amendment, The House divided; and the names being called for, they were taken down as follow:—

PRAYERS.

The following Petitions were severally brought up, and laid on the Table:—

By Mr. Bickerdike,—The Petition of Ernest J. Peltier and others, of Montreal.

By Mr. Douglas,—The Petition of the Reverend D. H. Telfer and others, of Hazel Bluff, and other places, Alberta.

Pursuant to the Order of the Day, the following Petition was read and received:—

Of Walter Joseph Hart, of Stettler, and others, of Alberta; praying for the passing of an Act extending the time within which entry for the land grant may be applied for, under the Volunteer Bounty Act, 1908, until the 31st December, 1912.

Mr. Miller, from the Select Standing Committee on Banking and Commerce, presented to the House the Fourth Report of the said Committee, which is as follows:—

Your Committee have had under consideration Bill to incorporate the Merchants and General Insurance Company, and have agreed to report the same with Amendments.

Mr. McCraney, from the Select Standing Committee on Standing Orders, presented to the House the Second Report of the said Committee, which is as follows:—

Your Committee have considered the Petition of Gerard G. Ruel and others, for an Act of Incorporation under the name of the James Bay and Eastern Railway Company, and the Report of the Examiner of Petitions thereon, dated 15th December last, that certain powers asked for in the Petition were not covered by the Notice, and they find that since the date of the said Report the Petitioners have caused an amended Notice to be published, covering all the powers asked for in the Petition, they have therefore to report that all the requirements of the Rule have now been complied with in this case.

Your Committee have also considered the Petition of Gerard G. Ruel and others, for an Act of Incorporation under the name of the Ontario and Ottawa Railway Company, and the Report of the Examiner of Petitions thereon, dated 17th instant, that the Notice had not been published in the County of Pontiac, through a portion of which the proposed railway is to be constructed, and that the Petitioners were also asking for certain powers, as to the generation and disposal of electric and other energy, and the collection of tolls for the use of their telegraph and telephone lines which were not covered by the Notice as published. As regards the latter irregularity, your Committee recommend, the Petitioners consenting, that the said powers be not included in the Bill. As regards the advertising of the Notice in the County of Pontiac, Your Committee find that the Petitioners have caused a copy of the Notice to be inserted in the English and French languages, in a newspaper published in that county, which notice will be fully matured by the 18th proximo, and, as the Bill cannot be considered in Committee before that date, and, as all the other requirements of the Rule have been complied with, Your Committee recommend that the defect, as regards the advertising in the County of Pontiac, be considered as amended.

On motion of Mr. Pardee, seconded by Mr. Talbot,

Resolved, That this House doth concur in the First Report of the Joint Committee of both Houses on the Printing of Parliament.

Mr. Speaker informed The House, That the Clerk had laid on the Table the Twenty-fourth Report of the Examiner of Petitions, which was read, as followeth:—

Pursuant to Rule 95, Section 2, the Examiner of Petitions for Private Bills, has the honour to present the following as his Twenty-fourth Report:—

MR. SPEAKER'S RULING RE PRODUCTION OF PAPERS.

MR. SPEAKER,—I promised the Hon. Member for York (Mr. Crocket), yesterday, that I would look into the question raised by him, in reference to an answer to a question on the Order Paper, of the Hon. the Minister of Public Works.

The answer referred to stated that a certain Company declined to tender for certain work, and that the said Company gave as a reason for declining that they found certain difficulties attending upon the work. The Hon. Member for York asked the Hon. Minister to lay the papers referred to on the Table. As a matter of fact, the answer of the Hon. Minister did not refer to any papers, and the Hon. Minister himself stated to the House that he was not sure there was any correspondence on the subject. The Hon. Member for York asked if he was not entitled to demand that the correspondence, if any, be laid upon the Table, without an Order of the House.

The Rule of Parliament, in respect to the production of papers, is that no document can be laid before the House unless in pursuance of some parliamentary authority. The proper parliamentary authority is, of course, an Order of the House, which must be moved for under the Rules of the House as to notice. There is, however, a rule of debate, which the Hon. Member for York probably had in his mind, to the effect that when a Minister of the Crown quotes a public document in the House and founds upon it an argument of assertion, the document quoted from should be produced. This rule does not apply to the case in question, as I do not find that the Hon. Minister quoted from any public document; in fact, he stated that he was not sure there was any correspondence on the subject.

I am of opinion, therefore, that the Hon. Member for York is not entitled to the production of any correspondence or papers, if any, without following the Rule of the House as to papers, on motion after notice.

"That no such proposals can safely be accepted, unless they thoroughly ensure unity of organization and of action, without which there can be no effective co-operation in any common scheme of Empire defence.

"That the said proposals, while necessitating heavy outlay for construction and maintenance, will give no immediate or effective aid to the Empire, and no adequate or satisfactory results to Canada.

"That no permanent policy should be entered upon, involving large future expenditure of this character, until it has been submitted to the people and has received their approval.

"That, in the meantime, the immediate duty of Canada and the impending necessities of the Empire, can best be discharged and met by placing, without delay, at

“the disposal of the Imperial authorities, as a free and loyal contribution from the
“people of Canada, such an amount as may be sufficient to purchase or construct two
“battleships or armoured cruisers of the latest Dreadnought type, giving to the
“Admiralty full discretion to expend the said sum at such time and for such purposes
“of naval defence as in their judgment may best serve to increase the united strength
“of the Empire and thus assure its peace and security.”

That all the words after the word “That” be struck out, and the following substituted therefor: “this House, while declaring its unalterable devotion to the British Crown, is of opinion that the Bill now submitted for its consideration, changes the relations of Canada with the Empire, and ought, in consequence, to be submitted to the Canadian people, in order to obtain at once the Nation’s opinion by means of a plebiscite.”

The vacancy in the First Division B, above referred to, is caused by the retirement on superannuation, of Mr. A. G. D. Taylor, late Chief Clerk of the English Journals, which took place on the first day of January, of the present year.

HOUSE OF COMMONS, CANADA,

OTTAWA, 18th February, 1910.

To the Honourable

The Speaker of the House of Commons.

SIR,—The superannuation of Mr. A. G. D. Taylor, which took effect on the 1st day of January, 1910, created a vacancy in First Division, Subdivision B, of the organization of the Staff of the House of Commons.

I have the honour to recommend for promotion to the vacancy, Mr. James Dalton, Clerk of English Journals, who is at present graded in the Second Division, Subdivision A.

This promotion is recommended for merit, as this official has been for thirty-five years in the service of the House, having been first appointed in 1875, as a Permanent Sessional Clerk. In 1880 he was an Assistant Clerk to the Select Standing Committees on Railways, Canals and Telegraph Lines, Public Accounts and Banking and Commerce. In 1882 he was appointed Clerk of Sessional Records. In 1886 he became Assistant Clerk of English Journals and Clerk of Petitions. In 1888 he was graded to the status of a First Class Clerk, and, on the retirement of Mr. Taylor, he was appointed Clerk of English Journals.

Mr. Dalton has, in these various positions assigned to him, discharged his duties with zeal and to the satisfaction of the authorities of the House. He is, therefore, in my opinion, justly entitled by experience and qualifications for promotion to First Division, Subdivision B.

Having satisfied them-

selves that Mr. Dalton is specially fitted for the duties of the position to which he is to be promoted, and that his qualifications are such as to render unnecessary any special examination in his case,

On motion of Mr. Nesbitt, seconded by Mr. Martin (Regina),

Ordered, That Bill from the Senate, intituled: "An Act respecting the Sovereign Trust Company," be now read the first time.

The Bill was accordingly read the first time; and ordered to be read a second time at the next sitting of the House.

Ordered, That Mr. Oliver have leave to bring in a Bill to amend the Volunteer Bounty Act, 1908.

He accordingly presented the said Bill to the House, and the same was received and read the first time; and ordered to be read a second time at the next sitting of the House.

Mr. Fisher, a Member of the King's Privy Council, presented.—Return to an Order of the House, dated 28th February, 1910, for a copy of Reports of the following Quarantine Frontier Inspectors:—Dr. Bradford, Dr. Carter, Dr. Duncan, Dr. Thornton, Dr. Wallace, Dr. May, Dr. McKenty, Dr. Little, Dr. Henderson and Dr. Scott. (*Sessional Papers, No. 132.*).

The House then resumed the adjourned Debate on the proposed motion of Sir Wilfrid Laurier, That the Bill respecting the Naval Service of Canada be now read a second time.

And the proposed Amendment of Mr. Borden, That all the words after the word "That" be left out, and the following substituted therefor:—"the proposals of the Government do not follow the suggestions and recommendations of the Admiralty and in so far as they empower the Government to withhold the naval forces of Canada from those of the Empire in time of War are ill-advised and dangerous.

"That no such proposals can safely be accepted unless they thoroughly ensure unity of organization and of action without which there can be no effective co-operation in any common scheme of Empire defence.

"That the said proposals, while necessitating heavy outlay for construction and maintenance, will give no immediate or effective aid to the Empire, and no adequate or satisfactory results to Canada.

"That no permanent policy should be entered upon, involving large future expenditure of this character, until it has been submitted to the people and has received their approval.

"That, in the meantime, the immediate duty of Canada and the impending necessities of the Empire can be best discharged and met by placing, without delay, at the disposal of the Imperial authorities, as a free and loyal contribution from the people of Canada, such an amount as may be sufficient to purchase or construct two battle-ships or armoured cruisers of the latest Dreadnought type, giving to the Admiralty full discretion to expend the said sum at such time and for such purposes of naval defence as, in their judgment, may best serve to increase the united strength of the Empire and thus assure its peace and security."

And the proposed amendment to the amendment by Mr. Monk, That all the words after the word "That" be struck out, and the following substituted therefor: "this House, while declaring its unalterable devotion to the British Crown, is of opinion that the Bill now submitted for its consideration, changes the relations of Canada with the Empire, and ought, in consequence, to be submitted to the Canadian people, in order to obtain at once the Nation's opinion by means of a plebiscite."

And the Question being put on the amendment to the amendment; The House divided; and the names being called for, they were taken down, as follow:—

CONSIDERATION OF AMENDMENTS MADE BY THE SENATE TO PRIVATE BILLS.

MR. SPEAKER,—I desire to call the attention of the House to Rule 113, which refers to amendments made by the Senate to Private Bills. The Rule is as follows:—

“When any Private Bill is returned from the Senate with amendments, the same not being merely verbal or unimportant, such amendments are, previous to the second reading, referred to the standing committee to which such Bill was originally referred.”

I fear that this rule has not been as rigidly adhered to as is desirable; very frequently amendments, which are in reality important, being treated as “verbal or unimportant.”

Lengthy reference is made to this rule by Bourinot, pp. 794-5, to which I would call the attention of Honourable Members.

I shall be obliged in future to insist that this rule be more carefully observed than has recently been the custom.

Bills Nos. 107, 61, 46 and 114 respectively, now before the House, should be referred to the proper Committees before being concurred in.

The House, according to Order, proceeded to take into consideration the Amendments made by the Senate to the Bill, intituled: “An Act to incorporate the Ottawa, Montreal and Eastern Railway Company,” and the same was read, as follow:—

Sir Wilfrid Laurier, a Member of the King's Privy Council, laid before the House,—Recommendation of the Honourable the Speaker, and Schedule relative to the reorganization of the House of Commons Staff, which is as follows:—

THE CIVIL SERVICE ACT AND AMENDMENTS THERETO.

To the Honourable

The House of Commons.

The Speaker of the House of Commons has the Honour to recommend, for the reasons set forth in the report of the Clerk of the House, hereto annexed:—

That the organization of the Staff of the House of Commons, adopted by the House on the 10th day of May, 1909, be cancelled; and that the organization as set forth in the schedule referred to in the said report be adopted in lieu thereof.

CHARLES MARCIL,

Speaker of the House of Commons.

April 6th, 1910.

OTTAWA, April 5th, 1910.

The Honourable

The Speaker of the House of Commons.

SIR,—The Civil Service Amendment Act, 1908, provided that as soon as practicable after the coming into force of the Act, the organization of the Staff of the House of Commons should be determined and defined by resolution of the House of Com-

mons; and that after being so determined and defined, the said organization should not be changed except by resolution of the House of Commons.

The organization as approved by the House of Commons, on the 10th May, 1909, simply carried over into the new Act substantially the old arrangement of the Staff, which was merely one of convenience, having no legal significance.

Circumstances, in connection with the promotion of officers from one grade to another, have arisen which show that that form of organization creates many difficulties which may easily be avoided by changing the organization.

At present there are no less than thirteen so-called "Branches" in the House of Commons where there should be but two branches—the "Chief, or Clerical, Branch," and the "Sergeant-at-Arms Branch." The difficulty has arisen from not taking into full consideration the significance of the term "branch," as used in the Act.

The consequence of the present form of organization is that promotions from one division, or grade to another can only be made within the limited sphere of each so-called "branch," a state of things which was not contemplated by the House, and which, if continued, would render the making of promotions very complicated and difficult.

The settled policy of the authorities of the House on this subject is that there should be no increase in the present number of officials in any grade or division, as established by the present organization, but that promotions shall only be made to vacancies, and that such promotions shall be available to the whole staff of the House, and not confined, as at present, to the particular branch in which the vacancy may have occurred. It is only to accomplish this end that the change of form of organization is desirable.

After consultation with the Civil Service Commissioners and with the Deputy Minister of Justice, and with the approval of the Members of the Board of Internal Economy of the House, I beg leave to recommend that the organization of the House of Commons, as approved on the 10th May, 1909, be cancelled, and that a new organization in the form annexed hereto be adopted in lieu thereof.

The new organization thus recommended makes absolutely no change whatever either in the grade, status, pay or duties of any officer of the House, but merely removes the difficulties referred to.

The new form of organization recognizes two Branches only—the "Chief, or Clerical, Branch," and the "Sergeant-at-Arms Branch," as set forth in the schedule annexed.

Sergeant-at-Arms Branch.

Last June the Auditor General called my attention to what he conceived to be an erroneous interpretation of the Act, whereby in the said organization of 10th May, 1909, in the Department of the Sergeant-at-Arms, Messieurs Lucien Dubé, Peter Connolly and Charles George were classified as in certain divisions mentioned in the said organization. The Auditor General expressed the opinion that the classification of these employees should have been as set forth in the said schedule.

At first I questioned the Auditor General's view on the subject, but a similar question having arisen in connection with employees of the same class in the Senate, and the same objection having been taken by the Auditor General in that case, the subject was referred to the Department of Justice. That Department upheld the Auditor General's contention.

Consequently, I recommend that the organization of the Sergeant-at-Arms Branch be changed to meet this decision, in which, after further investigation of the subject, I feel obliged to concur.

I have the honour to be, Sir,

Your obedient servant,

THOS. B. FLINT.

Clerk of House of Commons.

Mr. McCraney, from the Select Standing Committee on Standing Orders, presented to the House the Third Report of the said Committee, which is as follows:—

Your Committee have considered the Petition of C. M. Edwards and others, for an Act of incorporation, under the name of the Ottawa and Montreal Power Transmission Company, and the Report of the Examiner of Petitions thereon, as contained in the Votes and Proceedings of 14th March, and, in view of the facts as set forth in the said Report, they recommend that the Company should not be authorized to exercise their powers within the Province of Ontario, but that they should be restricted in their operations to the area within which they have published their Notice.

Your Committee have also considered the Bill from the Senate, intituled: "An Act to incorporate the Laurentian Insurance Company," and the report of the Examiner of Petitions thereon, that no Notice for the incorporation of a Company under that name had been published, and that they find that the applicants caused a Notice to be duly published for the incorporation, of a Company, under the name of "The Insurance Company of Canada," but the Senate, not approving of the said name, changed the same to that of the Laurentian Insurance Company. Under the circumstances, your Committee, being of the opinion that the applicants had complied with the requirements of the Rule, to the best of their ability, by publishing the notice aforesaid, that the change of name was made in the public interests, and that no rights or interests will be injuriously affected by the said change of name, recommend that the Notice as published be deemed sufficient.

House in Committee on Bill to amend the Criminal Code, (Reported from Special Committee as Amended).

Mr. Miller moved, seconded by Mr. Tolmie, That Mr. Speaker do now leave the Chair for the House to go into Committee on the said Bill.

And a Debate arising thereupon;

And objection being taken, "That inasmuch as the evidence reported by the Committee on this Bill is not printed in the French language, the Debate and present proceedings are not in order, and consequently the motion for Committee and the Debate should stand until such evidence is so printed in French."

Mr. SPEAKER.—The point of order, as I understand it, is that the consideration of this Bill cannot be proceeded with until the evidence, laid on the Table with the Report of the Committee to which it was referred, is translated and printed in the French language. There is a custom here that reports of Committees may be made in either language, and on the day following their presentation they appear in the Votes and Proceedings in both languages. Rule 71 says that all Bills shall be printed before the second reading in the English and French languages. Previous speakers have held that the point of order that a Bill has not been printed in both languages must be taken before the second reading, and that if it is not taken then, it cannot be taken afterwards, and they have allowed the discussions to proceed upon a Bill printed only in one language. In the present case the Bill as reported by the Committee has been printed in both languages. I have looked in vain since Confederation for a precedent to enable me to decide whether or not this Bill could be considered when the evidence taken by the Committee to whom it has been referred and reported with the Bill has not been translated and printed in both languages. I have found nothing since Confederation bearing on that point. There was a decision given by Mr. Speaker Turcotte, previous to Confederation, on the 19th March, 1863, which was reported as follows:—

The adoption of a report of a Committee, respecting the employees of the House, having been moved by John Simpson, Esquire, an objection was raised by H. L. Langevin, Esquire, that the report was not printed in French and distributed to Members in that language. After a considerable discussion on the subject, the Speaker was understood to declare: "That the report could not be considered at present, in con-

sequence of the objection raised." The subject then dropped. That case is not precisely similar to the one under consideration.

Section 133 of the British North America Act provides that Members may speak in either French or English and that both those languages shall be used in the records and Journals of this House. The Votes and Proceedings contain the French version of the report of the Committee, but not the evidence. Whether or not it would be proper to stop all proceedings on this Bill now is largely a matter of policy for the House to decide and not a question of order for the Speaker. This evidence is now being translated and will be printed in the French language and duly distributed, but a decision to stop all proceedings until this is done would practically mean that this Bill could not be proceeded with this Session. Under the circumstances, I am not prepared to take that stand, seeing that I have found no precedent since Confederation bearing on the point of order. I will, therefore, allow the Debate to go on.

Mr. Wilson (Laval) moved, seconded by Mr. Martin (St. Mary's), That the ruling of Mr. Speaker on the point of Order raised by Mr. Wilson (Laval), be not sustained.

And the question being put on the said motion; the House divided; and the names being called for, they were taken down, as follow:—

"That the Government ought not to permit any part of such estate and property to become the prey of speculators at a price far below its value, but should observe and enforce all precautions and safeguards which are necessary to preserve to the Indians the full value and benefit of their property and to prevent it from being wasted and dissipated.

"That in respect of such matters, the Government should administer the affairs of the Indians as a trust, and should not permit any person to make an unjust profit at the expense of those whom it is the duty of the Government to protect.

"That this House desires to place on record its strong condemnation of the methods by which the Government secured the surrender of the St. Peter's Indian Reserve, near Selkirk, in the Province of Manitoba, and its equally strong condemnation of the failure of the Government to safeguard the interests of the Indians, in the disposal of the land so surrendered."

PRAYERS.

The following Petition was brought up, and laid on the Table.

By Mr. Campbell,—The Petition of Simeon W. Thomas and others, of Swan River, Manitoba.

Mr. Speaker informed The House, That the Clerk had laid on the Table the Thirty-seventh Report of the Examiner of Petitions, which was read, as followeth:—

Pursuant to Rule 95, Section 3, the Examiner of Petitions for Private Bills has the honour to present the following as his Thirty-seventh Report:—

Your Examiner has duly examined the following Private Bill from the Senate, and finds that all the requirements of the 90th Rule have been complied with, viz.:—

Bill intituled: "An Act respecting the British Northwestern Fire Insurance Company."

Mr. Sinclair, from the Select Standing Committee on Marine and Fisheries, presented to the House, the Eighth Report of the said Committee, which was read as followeth:—

Pursuant to a reference made to your Committee, during the last Session of Parliament, they have completed an investigation into the condition of the Lobster Industry on the coast of the Maritime Provinces and Quebec, and now ask leave to report.

Your Committee were greatly assisted in their labours by the officers of the Fisheries Branch of the Department, who furnished them with all the available statistics, and with the report of previous commissions dealing with the subject. Some twelve years ago a thorough and exhaustive investigation into the condition of the Lobster Industry at that date, was made under the direction of Sir Louis Davies, then Minister of Marine and Fisheries. The Commissioners who acted on that occasion were men well qualified for the task they undertook, and their report still holds an important place among the available literature dealing with this subject.

Certain recommendations were made by that Commission that were subsequently embodied in the regulations of the Department, and with slight changes comprise the rules governing the industry at this date. While these regulations in the main have been working out satisfactorily, requests for changes were constantly being pressed upon the attention of the officers, and *their refusal* some four years ago to grant any new licenses, together with the laxity on the part of the officials in enforcing the law, gave rise to a demand for a fresh investigation to ascertain if there was any real necessity for a revision of the existing regulations. This work was commenced during the last Session of Parliament and carried on and completed during the present session. A large number of meetings were held by your Committee. Witnesses were summoned from various points on the coast and examined on oath, and the evidence printed for the information of the House. In this way a large amount of valuable information was collected. The investigation had not proceeded far, however, when, owing to the conflicting views expressed by the witnesses examined, and the impossibility of bringing to Ottawa any considerable number of the fishermen and packers whose evidence was vital to the enquiry, your Committee found themselves face to face with a situation of unusual difficulty, and it became plain that in order to reach intelligent conclusions, more evidence was required than could

be secured through the cumbersome methods of a Parliamentary investigation conducted at Ottawa. Your Committee therefore recommended to the Minister that a Commissioner be appointed with authority to travel the coast and visit the principal localities where the Lobster Industry is carried on, and, after public advertisement in each case of the date and place of meeting, to take the evidence on oath of all parties presenting themselves for examination.

This recommendation was acted upon and Commander William Wakeham, M.D., the officer in charge of the Gulf Fisheries Division of the Province of Quebec, was appointed by the Minister to perform that duty. In the opinion of your Committee, no better selection could have been made. Commander Wakeham's long experience in the conduct of judicial enquiries, and his life-long study of the fishing industry, endowed him with special qualifications for the task entrusted to him. He began the work at the Magdalen Islands on July 12th and concluded it at Grand Manan on September 22nd.

He visited a very large number of important fishing points, on the coast of each of the four Provinces and examined on oath no less than 261 witnesses, 175 of whom were fishermen.

In many cases the witnesses examined were representative fishermen, specially delegated to express the views of others who could not attend in person. The results are to be found in two large volumes, aggregating 1,227 pages of printed matter.

From this mass of evidence Commander Wakeham arrives at certain findings, all of which are respectfully submitted for the information of the House. Your Committee do not see their way clear to concur in all the conclusions and recommendations of Commander Wakeham, but desire to draw attention to the following summary which, in the opinion of your Committee, is fully borne out by the evidence:—

"1. It is shown that it is impossible to have one universal close time for the whole coast. The climate and ice conditions are such that different sections of the coast demand different seasons.

"2. It is clearly proved that the regulation as regards the size limit is not observed, that it never was observed; that from the earlier times the canners never refused small Lobsters; that they are to-day taking smaller Lobsters than they did years ago is shown beyond doubt by the style of trap now used, which captures and holds Lobsters that would easily have escaped from the old fashioned engine.

"3. It is almost universally admitted that a strict enforcement of even an eight inch limit would close up the canneries and shut off the fishermen.

"4. The evidence as regards the berried Lobster regulation is very doubtful. A few acknowledge, at some time, having violated this themselves, a great many believe that others than themselves have violated it. There is no doubt that it has been constantly violated. Berried Lobsters have gone into the boilers intact, and where the canners have tried to be strict the berries have been washed off outside. There is, however, no doubt that an increasing number of fishermen are becoming alive to the necessity of protecting this Lobster, and the formation of Fishermen's Unions, with the consequent bringing together of the fishermen, and the resulting discussions as to the regulations, and future of the fishery, has greatly conduced to a better observance of the regulations.

"5. As regards the traps the evidence undoubtedly shows that the tendency has been to narrow the space between the slats and to lessen the size of the mesh in the end, so as to hold the smaller Lobsters required to keep up the pack. The trap as now built has generally a space of less than one inch between the slats and when the trap has become watersoaked the space is still further contracted.

"The first indication of a failing fishery, due to over-fishing, is always a decrease in the average size of the fish, and this is invariably met by the fishermen by

making the mesh of the trap or gill-net smaller. As the average run of the Lobsters became smaller it became necessary, if the catch had to be kept up, to narrow the outlets and to make them more complicated, so as to hold everything that entered the trap. Some difference of opinion exists as to the extent to which small lobsters try to escape out of the trap; but by the fact of the increasing ingenuity which is everywhere being exercised to hold them, it is shown more clearly and positively than it could be by any verbal evidence that they did escape under former conditions with the original traps and that the modern engine is being perfected so as to hold them. We know that when disturbed and alarmed, a lobster can move short distances with great speed and wonderful accuracy. Any one who has ever fished for lobsters must have noticed how quickly and accurately they can shoot themselves out of the funnel-like openings in the end of the traps.

"There can be no doubt whatever that at least a proportion of small lobsters would escape out of the traps were a sufficient opening allowed, and it is just as reasonable to insist on a fixed opening between the slats, and in the mesh of the net, at the end of the traps, as it is in the case of salmon or whitefish gill-nets.

"As regards the matter of licensing canneries, some difference of opinion exists; but a majority are of opinion that any one showing his ability and competence to operate a cannery should be allowed to do so. All are agreed that the canneries should be subject to inspection and that a certain standard should be insisted upon. The general opinion of those most competent to judge, is that it is not necessary to have the product inspected, officially; that this is pretty well provided for already by the purchasing agents, who visit the canneries at many points to inspect and check the work during the packing season. There are certain marks or brands, particularly of the older packers, which are accepted everywhere. No official inspection would carry as strong a guarantee as these well known brands already do."

The most difficult question dealt with by Commander Wakeham, and the one that gave your Committee the most concern, was the question of the size limit. Is it practicable to enforce a size limit, and, if strictly enforced, what effect would it have on the industry? These are questions that should not be answered lightly. It is well known that regulations prescribing a size limit for lobsters caught in Canadian waters, have existed for the past thirty-six years, but your Committee were unable to discover that these regulations had ever been of the slightest use towards preserving the lobster fishery. The officers of the Department were subjected to a strict examination by your Committee, and they frankly admitted that the enforcement of the regulations in question had been found to be impracticable.

When we consider that the lobster fishery is carried on along five thousand miles of coast by some three thousand boats, and the catch delivered at some 700 canneries to be packed, and that many of these canneries are situated at remote and inaccessible points on the coast, and that the boiling and packing must be done as soon as the fish are landed, we can readily see how difficult it must be to detect violations of the law, at all events, so far as the size limit is concerned. Even if an officer was stationed at every cannery, the real offender would in many cases escape, as many of the boats do not land their own catch, but are visited by collecting smacks, who receive the lobsters and transport them to the canneries. Besides, it is well known, and will be admitted by everybody who has given any consideration to the matter, that a regulation that is incapable of reasonable enforcement is not only useless, but a positive injury to everybody connected with the business. For example, the fisherman who is honestly desirous not only to observe the law relating to the preservation of the berried lobster himself, but to compel his neighbour to do likewise, is restrained from doing so because he finds it impossible, in his own case, to live up to the regulation regarding the size limit.

Then, assuming that by the employment of hundreds of special officers and the expenditure of large sums of money, that this regulation could be enforced, your

Committee, in that case, were bound to consider the effect its enforcement would have on the industry itself. There can be no doubt whatever that the strict enforcement of the size limit, set out in the existing regulations, would practically close the factories all along the coast and turn a very large number of people out of employment. This view was held by scores of witnesses who were examined during the course of this enquiry. The proof on this point is ample. In this connection we may point out that on the suggestion of your Committee the Department, during the last fishing season, employed a large force of officers to visit all the chief points in the Maritime Provinces, where the lobster fishery is carried on, and meet the boats on landing their catches and make actual measurements of all the lobsters in each boat selected, and compile and return same to the Department. This was done from day to day throughout the fishing season. 600,000 lobsters were measured. The coast of every county in the Maritime Provinces was visited, and the actual measurements, down to a fraction of an inch, tabulated and returned to the Department. From these measurements we get the following abstract:—

- 25.7 per cent, 9 inches and over.

- 36.0 per cent, 8 inches and under.
- 8.7 per cent, under 7 inches.

In the case of the Districts above referred to, from number 1 to 8, inclusive, the legal size limit at present in force is eight inches. On the south shore of Nova Scotia, from Halifax to Yarmouth, the size limit is nine inches, and nine and ten and a half inches over the remainder of the coast to the United States boundary line.

By an examination of the above figures, it will be seen that in some districts more than one-half of the total catch is under the legal size. Take for example the district from Halifax to Yarmouth, where it was suggested that packing might be abolished altogether; in this district the following measurements were made:—

	Number of Lobsters Measured.
Lunenburg..	4,060
Queens..	19,513
Shelburne..	20,730
Yarmouth..	3,924
Digby..	12,094
	<hr/> 60,321

Of this number, 55.9 per cent were under the legal size. It will therefore be seen that the strict enforcement of the size limit, on this part of the coast, would have closed the canneries, which, according to the last official report, produced in 1908, a total pack of 1,451,720 one-pound cans, valued at \$362,930.

There is reason to hope that in this district, owing to its proximity to the Boston market, the live lobster industry may in time displace the canneries, but this state

of things has not yet arrived. The packing industry in this district is too important yet to cut it off summarily.

We may here observe that doubts have been entertained regarding the value of the statistics, relating to the live lobster industry, and your Committee are pleased to know that an effort is being made to render them more thorough and reliable.

The question of licensing new canneries was carefully investigated, and arguments on both sides received the best consideration of your Committee. It is of especial importance that the goods be clean and properly packed, and, in order to insure this, your Committee would recommend that each applicant for license be required to furnish an up to date equipment. We see no reason, however, for refusing a license to any responsible party who is prepared to live up to this requirement.

We may further be permitted to say that your Committee do not see any good reason to be despondent in regard to the future of the Lobster Industry. They are pleased to note that it continues to show signs of extraordinary vitality.

We have pointed out that for many years past the berried lobster has been wantonly destroyed and the size limit disregarded, yet the yearly output from the canneries is practically the same as it was twelve years ago. True, it has taken a larger number of traps to catch the same quantity of fish, but this we believe, holds good in other fisheries as well as in the lobster fishery.

According to the Departmental Statistics, the number of lobster traps in use in 1897 was, 1,156,352; the number in use in 1908, the last year for which we have complete returns, was 1,477,623, showing an increase of 321,271 traps in twelve years.

The total quantity packed in all the lobster factories in Canada, in 1897, was 11,130,554 one pound cans, while in 1908 the total output amounted to 10,911,498 one pound cans. While there is no increase in quantity, there is a very substantial increase in value.

The most discouraging feature in regard to the industry is the marked decrease in the shipment of live lobsters. The live lobster trade is the most profitable branch of the industry, and every effort should be put forth to encourage it. In many parts of the coast the live lobster trade is impossible for lack of proper transportation facilities, and any assistance that can be given by way of subsidies to coasting steamers to collect the catch and deliver them at shipping points must prove of great importance to this branch of the industry.

We may further say that while there is much of a hopeful nature to report, we do not desire to conceal the fact that the fish taken are smaller, and that the total quantity is considerably less than it was in former years. There is good reason, however, to hope that with the rigid enforcement of the law for the preservation of the berried lobster, the widening of the spaces between the slats of the traps, and a substantial expansion of the policy of providing pounds and hatcheries along the coast, the industry may yet hold its own. If, however, the catch still continues to decrease, it may become necessary in the near future to take more energetic measures for its preservation.

In conclusion your Committee ask leave to make the following recommendations:

1. That the existing regulations relating to size limit be abolished.
2. That, in lieu thereof, regulations be adopted and enforced providing that all traps used for the taking of lobsters, constructed after 1910, shall have the laths placed not less than $1\frac{1}{4}$ inches apart, and that the mesh, when netting is used, be not less than three inches extension measurement; and that, commencing with the year 1911, all existing traps be remodelled by removing a sufficient number of laths nearest the bottom from each side and replacing the same so that the three lower spaces shall be each not less than $1\frac{1}{4}$ inches.
3. That any person or firm equipped to the satisfaction of the Department, be entitled to a license to pack; that a standard of equipment be aimed at and that

existing factories be brought within the regulations as to equipment, within two years from date of the adoption of the new regulations; and that no officer or other person in the employ of the Department shall be directly or indirectly interested in any plant or factory operating under license from the Government.

4. That the present regulation, imposing a fee on each case of lobsters packed, be amended, so that commencing in 1911, five dollars be charged on any number of cases up to one hundred, and two dollars for each additional hundred cases or fraction thereof.

5. That more rigid regulations be adopted and strictly enforced, providing for the protection of the berried lobster.

6. That an educational campaign be inaugurated and carried on, under the direction of the Department, among the fishermen and packers, with a view of creating a sentiment in favour of observing and enforcing the regulations.

7. That the Counties of Charlotte and St. John, in the Province of New Brunswick, be a separate coastal division, with a size limit of 4 $\frac{3}{4}$ inches carapace measurement, and that the fishing season in such division be from 6th January to 29th June.

8. That having regard to the great importance of the Canadian fisheries, with vast interests allied, but distinct from the marine, your Committee would suggest that due consideration be given to the advisability of having a Deputy Minister appointed whose duties would be confined to the Fisheries Branch, independent altogether of the Marine Branch.

9. That your Committee are of opinion, from the evidence produced, that the propagation of lobsters by means of pounds and hatcheries, is of special importance to the lobster industry, and would recommend the extension, with as little delay as possible, of this branch of the service.

On motion of Mr. Haggart (Winnipeg), seconded by Mr. Bradbury,

Ordered, That Bill from the Senate, intituled: "An Act respecting the British "Northwestern Fire Insurance Company," be now read the first time.

'Whereas Petitions have been presented to the Government and to this House, from the Legislative Assembly of Manitoba, praying for an extension of the boundaries of the said Province, northward and eastward, and for an additional subsidy to the said Province, in lieu of the ownership of public lands in the Territory to be so added,

‘Be it Resolved:—

‘That it is expedient that the prayer of the said Petitions should be acceded to, and that, upon such terms and conditions as may be agreed to by the said Legislative Assembly and by Parliament, the boundaries of Manitoba be extended, as follow:—

‘The Northern Boundary to be the Sixtieth Parallel of Latitude; the Western Boundary to be the present Eastern Boundary line of the Province of Saskatchewan to the said Sixtieth Parallel; the Eastern Boundary to be the present Eastern Boundary of Manitoba, as far North as the Northeast corner of the Province, thence on a straight line to the most Eastern point of Island Lake, and thence on a straight line to the point where the Eighty-ninth Meridian of West Longitude intersects the shore line of Hudson Bay.

‘And be it further Resolved:—

‘That whereas, notwithstanding the extension of territory above described, the ungranted lands of the Crown, in the territory so to be added to the said Province, will still continue to be administered by the Government of Canada, for the purpose of the Dominion; and the said Province will not have the public land as a source of revenue.

‘It is just and equitable to recognize the increased cost of Civil Government, which such extension of territory will occasion to the Province, and, in view of the premises, to make to the said Province an increased allowance, by money payment, the amount of which should be the subject of negotiation between the Government of Canada and the Government of Manitoba.

‘And be it further Resolved:—

‘That, upon the Legislature of the Province of Ontario consenting thereto, it is expedient to extend the boundaries of the said Province, upon such terms and conditions as may be agreed to by the said Legislature and by Parliament, so as to include all the territory to the North of the said Province, lying between the extended boundaries of Manitoba, above described, and the waters of James Bay and Hudson Bay and the entrance thereto from the sea.’

“And whereas, at a Conference subsequent to said date, the delegates of the Province of Manitoba did offer to accept the said area, upon receiving equality of treatment either with the Provinces of Saskatchewan and Alberta, to the West of the said Province of Manitoba, or upon a basis of equal treatment with the Provinces of Ontario and Quebec, lying immediately to the East of the Province of Manitoba. And whereas, the Legislative Assembly of the Province of Manitoba did subsequently agree to and confirm the said offer of the said delegates of the said Province of Manitoba.

“Now therefore, be it resolved, That this House affirms that the Province of Manitoba is entitled to equality of treatment with either the said Provinces of Alberta and Saskatchewan, to the West, or with the said Provinces of Ontario and Quebec, to the East, and regret that the Government of the Dominion did not agree to give to Manitoba such equality of treatment.”

And the Question being put on the amendment; the House divided; and the names being called for, they were taken down, as follow:—

PRAYERS.

Mr. Miller, from the Select Standing Committee on Banking and Commerce, presented to the House the Eleventh Report of the said Committee, which is as follows:—

Your Committee have had under consideration Bill, from the Senate, intituled: "An Act to incorporate the Pioneers Loan Company," and have agreed to report the same with Amendments.

Mr. Geoffrion, from the Special Committee appointed to investigate the charges and allegations made by Hugh D. Lumsden, against a portion of the Engineering Staff of the National Transcontinental Railway, presented to the House the Fifth Report of the said Committee, which is as follows:—

Your committee met for organization on the 16th day of February last past, when Mr. Geoffrion was elected chairman. Numerous sessions have since been held; the printed record of the proceedings at such sessions is herewith submitted. Pursuant to summons, Mr. Lumsden appeared before the committee, at its meeting on the 2nd day of February, and stated that it was not his intention to be represented by counsel. He was several times at different sessions asked by the chairman and other Members of the committee, if it was still his desire not to be represented by counsel and he persisted in such desire. (See pages 10, 13 and 39.) And at the meeting of the committee on 5th March, he was again asked the same question and informed that he would be at no expense for counsel, which he stated had been his understanding. (P. 90.) In view of Mr. Lumsden's attitude, your committee obtained leave from the House to employ counsel for the purpose of assisting them in the investigation of the matters referred to them. Mr. F. H. Chrysler, K.C., was accordingly appointed, and Mr. Lumsden agreed to communicate with him and give him all the information possible bearing upon the matter. Mr. R. C. Smith, K.C., appeared on behalf of the Board of Commissioners of the National Transcontinental Railway, and Mr. J. H. Moss, K.C., on behalf of the engineers named by Mr. Lumsden, as those in whom he had lost confidence.

The order of reference, bearing date the 27th of January, 1910 (p. 1), directed your committee to investigate certain charges and allegations, made by Mr. Lumsden in his letter of resignation, dated 25th June, 1909, as modified by his letter of 26th June, expressed in the following sentence: "In view of the general disregard of my instructions and having lost confidence in the engineering staff, I have concluded to resign my position as chief engineer," and:—"referring to my letter of yesterday, wherein I stated that I have lost confidence in the engineering staff, I beg to state that this does not apply to the whole staff, but applies only to a portion of the staff who were responsible for the measurement, classification, supervision and inspection of considerable portions in District 'B' and east of Rennie's Crossing, in District 'F,' lately gone over by me."

In view of the indefinite nature of these statements, Mr. Lumsden was requested to amplify and give further details of his allegations, and a further statement in writing was produced by him and filed as Exhibit No. 1 (p. 19) and also, a list of the various stations, inspection of which, together with the statements made in his presence by certain of the engineers, during the visit of the first board of arbitrators, had,

as he stated, caused his loss of confidence in a portion of the engineering staff. (Exhibit No. 2, p. 27.) He also filed a partial list of names of engineers, intended to be implicated in his charges, as Exhibit No. 3 (p. 43), and a copy of what purported to be depositions of certain engineers examined before the board of arbitrators, during the course of their visit (Exhibit 3A, p. 44). These depositions were not admitted to the record by the committee, as having the force of evidence, but as being the statements which Mr. Lumsden swore at the time of their production were those made in his presence which has influenced him in resigning. Mr. Lumsden, when questioned as to the statements in these depositions, to which he attached importance, referred to but two or three, and it appeared to your committee, from subsequent evidence, that the engineers' answers to questions put to them had not been fully or correctly transcribed.

At the inception of the hearing before the committee, Mr. Lumsden stated that he appeared only as a witness and that he did not impute any bad faith to any of the engineers, and that the issue was simply a difference between engineers as to classification.

From the whole of the evidence taken before your committee, and especially that of Mr. Lumsden himself, that the substantial reason for the difference between Mr. Lumsden and the engineers under him, arose concerning interpretation of clauses 34, 35 and 36 of the specifications, which read as follow:—

Solid Rock Excavation.

34. Solid rock excavation will include all rock found in ledges or masses of more than one cubic yard which, in the judgment of the engineer, may be best removed by blasting.

Loose Rock.

35. All large stones and boulders, measuring more than one cubic yard, and all loose rock, whether in situ or otherwise, that may be removed by hand, pick or bar, all cemented gravel, indurated clay and other material, that cannot, in the judgment of the engineer, be ploughed with a ten-inch grading plough behind a team of six good horses, properly handled, and without the necessity of blasting, although blasting may be occasionally resorted to, shall be classified as 'loose rock.'

Common Excavation.

36. Common excavation will include all earth, free gravel or other material of any character whatever not classified as solid or loose rock.

36A. No classification, other than of common excavation, will be allowed on material from borrow pits, except by order in writing of the engineer.

It is to be observed that the language of these clauses, as pointed out by several of the engineers examined, and admitted by Mr. Lumsden, differs from that used in corresponding clauses in the specifications used in earlier railway construction, with which Mr. Lumsden was familiar. The real difference between Mr. Lumsden and the engineers arose in connection with the classification of the peculiar geological formation, met with in very large quantity upon portions of Districts 'F' and 'B,' consisting of clusters of boulders, of varying sizes, solidly cemented together in masses, which, according to the absolute consensus of testimony (including that of Mr. Lumsden), could not have been removed except by continuous blasting.

This difference of opinion developed at a very early stage of construction. The resident engineers, to whom the duty of classification as the work proceeds is committed, returned this material as solid rock, and in this had the approval of their immediate superiors, the division and district engineers.

While Mr. Lumsden states in his evidence that he was dissatisfied with the classification, he continued approving and certifying the monthly estimates, based upon this classification. He was, however, eventually compelled to take some action by the receipt of a letter from Mr. H. A. Woods, assistant chief engineer of the Grand Trunk Pacific Railway Company, of date 7th October, 1907, filed as Exhibit No. 10 (page 106), in which he complained of the classification of material on District 'B,' particularly with reference to an alleged over-return of solid rock.

Inasmuch as the rental, payable by the Grand Trunk Pacific Company to the Crown, is based upon a percentage of the actual cost of construction, that company has, of course, a direct interest in minimizing that cost, and the evidence shows that the company exercised fully its rights under the contract of maintaining engineers upon each district for the purpose of careful surveillance. These engineers had full access to the work as it proceeded, as also, to the records of the commissions' engineers, and were fully conversant with the methods of classification in vogue.

In his letter above referred to, of 7th October, 1907 (Exhibit No. 10) Mr. Woods made the following statement:—

In nearly every case where the cuttings were not entirely all ledge, the estimates given for solid rock is double or more than double what it should be. In fact the specifications had been entirely ignored, and an excessive allowance made, not by reason of an error in judgment, but as I understand, by special instructions from the assistant district engineer.

And:—

As before stated, those over-classifications are not made through error of judgment, nor upon the decision of the resident or division engineer who is fully acquainted with the character of the work, but by arbitrary orders from their superior.

This charge in Mr. Woods' letter engaged the very careful attention of your committee, but it was established that Mr. Woods withdrew the statement during an interview held at La Tuque on the 25th October, 1907. Mr. Lumsden, in his letter of 30th October, immediately after the La Tuque interview says:—

It appears Mr. Woods must have been in error when he stated that 'the specifications had been entirely ignored and an excessive allowance made, not by reason of an error in the judgment, but, as I understand, by special instructions from the assistant district engineer,' or, as stated by him in the latter part of his letter, 'by arbitrary orders from their superior.' (Exhibit No. 13, p. 110.)

Q. Did he not, in the presence of all those gentlemen, make a pretty full withdrawal of it?—A. He retracted it. My recollection is he retracted that statement altogether.

Q. And so far as you are concerned, and as far as your knowledge of your engineers is concerned, are you able to say whether there was a tittle of truth in Mr. Woods' charge that the classification had been made by arbitrary instructions from superiors?—A. No, I don't know anything of any such instructions.

Q. Do you believe that any such were ever given?—A. No, I can't say that I do.

Q. Have you any reason to suspect that any such were ever given?—A. I can't say there were. (P. 185).

Mr. A. E. Doucet, the district engineer of District 'B,' not only confirmed Mr. Lumsden's statement that Mr. Woods had withdrawn the charge, but added that Mr. Woods had agreed to confirm the withdrawal in writing (p. 544). Other engineers gave evidence to the same effect. Mr. Woods was summoned before the Committee and stated in corroboration of Mr. Lumsden and Mr. Doucet that he had withdrawn the statement.

After the meeting at La Tuque, above mentioned, the whole question of interpretation of the specifications upon which Mr. Lumsden and his subordinate engineers

had differed was considered by a number of the leading counsel of the Dominion, viz.:—Sir Alex. Lacoste, for many years chief justice of the Province of Quebec; Wallace Nesbitt, K.C., formerly a judge of the Supreme Court of Canada; G. F. Shepley, K.C., E. Lafleur, K.C., C. H. Ritchie, K.C., S. Beaudin, K.C., and Donald MacMaster, K.C. Every one of these counsel, without hesitation of qualification, expressed the opinion that the interpretation upon which the resident, division, and district engineers had proceeded in their classification, was the true one, and, as a consequence, that the opinion that Mr. Lumsden maintained was untenable. The interpretation of Mr. Doucet, and other engineers under Mr. Lumsden, is found in their letters, Exhibits No. 42 and following (p. 205 *et seq.*), and the opinions of counsel are filed as Exhibits No. 40 and following (p. 205 *et seq.*). From a perusal and comparison of these letters and opinions, it will be seen that every one of the high legal authorities above named, confirmed in a very positive manner, the views of these engineers, viz.: That 'rock in masses' meant rocks cemented together in masses of over a cubic yard (even though the individual rocks should be less) which, in the opinion of the engineer, could only be removed by blasting.

As a result of these opinions, and after the opinion of the Deputy Minister of Justice had been written to the commissioners (p. 117), Mr. Lumsden on 9th January, 1908, made a formal written interpretation of the clauses of the specifications in question, accompanied by a blue print of a drawing illustrating the interpretation (p. 117). In this he said:—

I am of the opinion that rock found in ledges or masses as specified must (firstly) be rock, and (secondly) it must be in ledges, conglomerate form (known as plum pudding stone), boulders or ledge rock displaced (in pieces each exceeding one cubic yard in size), rock assembled, also shale rock, such as in the judgment of the engineer, may be best removed by blasting.

Above the diagram, in the blue print indicating assembled rock, are the words:

'Rock in masses of over 1 cubic yard (assembled rock) which, in the judgment of the engineer, can be best removed by blasting.'

And at the foot of the blue print are these words: 'To form a judgment, &c.—'

Mr. Lumsden's view had been that 'rock in ledges or masses' meant ledge rock *in situ* or masses of detached ledge rock measuring a cubic yard. On page 189 of his evidence he says: 'It is the word "mass" that bothers me.'

Q. It is a troublesome word, isn't it? Isn't it really the troublesome word in the whole thing?—A. The word 'mass' as I understood it in the specifications, and do still, referred to masses of rock which were not boulders, but had been detached from the ledge.

Q. And your opinion was that it meant masses of solid rock?—A. Of rock, solid rock.

Notwithstanding his formal interpretation, he seems in his mind to have clung to his original opinion, as is apparent from his evidence on (p. 210).

A.—Well, I think the word 'masses' referred to rock that was not boulders, but masses of detached ledge rock.

Q. I understand that you modified that view, though. That was your view in October, 1907, but you don't adhere to it to-day?—A. I adhere still that masses may refer and were intended to refer to detached pieces of ledge rock.

Q. But I suppose you would be willing to extend that somewhat?—A. I have extended it in my subsequent interpretation to a mass of rock which was, I suppose, about two-thirds rock at any rate, or something like that, two-thirds rock and cemented material.

Q. You subsequently admitted that view, that it meant masses of detached ledge rock would be untenable? You have conceded that?—A. I have conceded it, but more on account of seeing and reading and going over these.

Q. Now, that is very instructive?—A. That there might have been a misunderstanding.

Q. I think it is fair to us, if you still adhere to your original view, that you should tell us; now, do you or do you not? Was your real opinion influenced or changed by perusing the opinions of counsel or others?—A. Well, between the opinions of counsel and the opinions of the engineers, and my consultation with Mr. Schreiber, I did conclude to change that part of it referring to solid rock.

Q. You say you concluded to change?—A. Yes.

Q. But opinions are really not a matter of choice or volition, are they? Were you convinced?—A. I know what I understood in the first instance, when the specification was made, that it was nothing but rock.

Q. So that, really, while out of deference to the numerous other opinions expressed, you may have consented to modify your expressed opinion, in reality you are like a woman, convince her against her will, she holds the same opinion still; isn't that true?—A. Yes, I held that opinion at the first start until I consulted with Mr. Schreiber and saw the different views taken by the learned Counsel and engineers, and I modified it to the extent, as you know, in my subsequent—

Q. But still feeling down deep in your consciousness that your first view was the true view?—A. Well, my first view was the one—When that first interpretation was made, I certainly understood it to be all solid rock.

Your Committee need not at this point discuss whether Mr. Lumsden's view of the specifications was in fact correct or not, as this is a mixed question of law and of engineering opinion; but there can be no question that Mr. Lumsden's written interpretation seemed to accord with the views which had been expressed by his District Engineers and by the legal opinions referred to, and which had been acted upon by the engineers in their classification.

The interpretation, drafted as it was by Mr. Lumsden and illustrated by the accompanying blue print, was submitted to the commissioners and accepted by them, and was subsequently submitted to the Assistant Chief Engineer of the Grand Trunk Pacific, Mr. Woods, and his letter approving of the same found on page 243. This interpretation was officially communicated by Mr. Lumsden to the district engineers under him, and a conference was arranged by Mr. Lumsden at his office in Ottawa, at which the district engineers appeared, and Mr. Lumsden then further modified his interpretation and instructions regarding measurement of this massed material by adding to his letter the following:—

In short, actual measurement has been made of all classified material returned, and not by percentages, except in cases where remeasurements are impracticable, in the judgment of the engineer in charge. (Exhibit 32, page 150.)

The uncontradicted evidence, and especially that of Mr. Lumsden himself, shows that no engineer was appointed by the Commissioners except upon the recommendation of Mr. Lumsden himself. There has not been, in the whole course of the Enquiry, a suggestion that the appointment of any engineer was imposed on Mr. Lumsden, or that the commissioners ever declined to give effect to any recommendation of Mr. Lumsden, for the dismissal of any engineer. All the engineers in whom Mr. Lumsden declared, in his letter of resignation, that he had lost confidence, were appointed by the Board of Railway Commissioners, upon his own recommendation in writing, as will be seen on reference to Exhibits Nos. 31, 32 and 33, pages 149, 150 and 151.

Mr. Lumsden, as Chief Engineer, was, therefore, responsible for the Engineers under his charge, and he had such absolute control over them as the Chief Engineer in such works always has.

Moreover, Mr. Lumsden, under the terms of the Contracts between the Commissioners and the contractors, was clothed with absolute authority in dealing with the contractors, it being provided that:—

All instructions or certificates given, or decisions made by any one acting under the authority of the Chief Engineer, shall be subject to his approval. (Page 147.)

In all cases where the Contractor or the Commissioners are dissatisfied with the decision of the Engineer or Inspector in immediate charge of the work, an appeal to the Chief Engineer may be made.

And by Clause 15 it was provided:—

That the Engineer shall be the sole judge of the work and material in respect of both quality and quantity, and his decision in all questions in dispute with regard to work or material, shall be final.

He was thus constituted the supreme authority upon the whole work. There was in the contracts (Clause 39) the further provision that:—

The progress measurements and progress certificates shall not, in any respect, be taken as binding upon the Commissioners, or as final measurements, or as fixing final amounts; they are to be subject to the revision of the engineer in making up his final certificate, and they shall not, in any respect, be taken as any acceptance of the work or release of the Contractor from responsibility in respect thereof, but he shall, at the conclusion of the work, deliver over the same in good order, according to the true intent and meaning of this Agreement.

The commissioners had further security provided in the drawback of ten per cent of the progress estimates under Clause 34, together with a lien upon all the plant, material and machinery belonging to the Contractor. The amounts payable under the contracts, and even the progress estimates themselves, together with the quantities and classification, were thus subject to the absolute and final revision and decision of Mr. Lumsden, as Chief Engineer.

Notwithstanding that Mr. Lumsden was thus vested with the full control of his engineering staff and the full direction of the work as it progressed, it is to be observed that he never made any complaint whatever to the Commissioners, of any Engineer, nor did he ever give the Commissioners so much as a hint that he had begun to lose confidence in any of the engineers upon the staff. Mr. Lumsden occupied an office in Ottawa with the Commissioners and it appears extraordinary that the first word of complaint against his engineers should come in his letter of resignation. He himself attributes his loss of confidence in the engineering staff to what he saw and heard upon the tour of inspection with Mr. Schreiber and Mr. Kelliher, who went with him for the purpose of an arbitration, under the provisions of Clause 7 of the agreement between the Commissioners and the Grand Trunk Pacific, to which it will be necessary to make some further reference. But Mr. Lumsden, in his letter of 24th September, 1908 (Ex. 8, p. 103), expressed dissatisfaction with his position as Chief Engineer, upon the grounds that the Commission differed from an ordinary railway Corporation, inasmuch as its powers were limited by the Act, and they had not the same freedom of action to meet difficulties as they arose in the construction of the work; that his salary was inadequate, and that the magnitude of the work subjected him to strain and worry. In that letter Mr. Lumsden says:—

Personally, I feel that matters are so different under a government commission, whose powers are limited by the Act, to what they had previously been under a Corporation, who could act on their own initiative, and taking the responsibility of making such modifications in contracts as now suggested by me, in just such difficulties as are now being experienced in District 'F,' that unless some relief can be given, the strain and worry connected with my present position is more than I can stand, especially as the salary is not in proportion to the responsibility involved.

It is difficult for your committee to present in succinct the substance of the evidence taken with regard to the trip of inspection by Mr. Lumsden and the other arbitrators, upon which he says he acquired the information which led to his resignation. He, with the Chief Engineer of the Grand Trunk Pacific and Mr. Schrieber, were ap-

pointed to arbitrate certain differences in cuts, which had been specially indicated in Mr. Woods' letters. Their whole tour of inspection on District 'E' lasted from the 22nd May to the 5th June, 1909; and, from the evidence of Mr. Lumsden himself, his inspection appears to have been of the most cursory and superficial character. There were hundreds of rock cuttings, many of which had taken from six to fifteen months to make, and in which the classification had been made by resident engineers, on the ground, who actually saw the material removed from week to week; and Mr. Lumsden, upon walking through a cut, the slopes of which had naturally undergone considerable changes, as explained by a number of the engineers examined before the committee, undertook, by mere guess work, to condemn the original classification and to determine what it ought to have been. The method of doing so, according to Mr. Lumsden, was that he and Mr. Kelliher would average their guesses, or, where they failed to agree upon this, they asked the opinion of Mr. Schreiber, and the notes in Mr. Lumsden's diary represented, as a general rule, what, as he himself states, he was 'willing eventually to put down' (p. 368).

The engineers on the ground were not only not invited to give any explanations of their work, but were given to understand that no explanations were desired. On this point Mr. Lumsden's evidence is as follows (p. 455):—

Q. I think you told us already that it was intimated to Mr. Poulin that he was not wanted to interfere, that the engineers were not allowed to say anything? —A. There was to be no discussion on the work.

Q. That was the scheme?—A. Yes.

Fragmentary depositions which were taken, and which had been filed by Mr. Lumsden, were taken away from the work and without the engineers having opportunity of referring to their notes or records.

Mr. Lumsden did not take measurements, and in very few instances, indeed, did he cause any diggings to be made into the sides of the slopes; and these, according to the evidence of the engineers, were quite inadequate to give any indication of the character of the material behind the face of the slope. It was established conclusively that the face of the slopes of the cuttings changes very rapidly after their completion, and that it was impossible to form any accurate idea of the nature of the material from such a cursory examination; in fact, Mr. Lumsden had taken this position in a previous letter to Mr. Woods, of date 15th May, 1908, (p. 254), in which he says:—

What I mean is this, that if, on examining work, say a cutting practically finished, I thought the classification appeared to be excessive, I would not be prepared to ignore the classification made by the engineer, who had seen the work from day to day, and state what the classification should be, without being able to verify my own ideas by actual measurements and observations of material found beyond the slopes and of the material taken from such cutting for waste when the material had been deposited. This would take considerable time, but would give a good idea of any great excess of solid rock or other classified material that might have been returned in such cutting.

Similar statements are found in several of his letters and throughout his evidence.

The same method was pursued by him on district 'B.' He went over 150 miles, the whole tour of inspection being made between 16th June and 22nd June, 1909. No measurements were taken and only one small digging was made.

At the conclusion of the trip on District 'B,' letters of protest against the manner in which the inspection had been conducted, were written to the Commission by District Engineer Poulin, of District 'E,' (found on p. 453, Ex. No. 73); by District Engineer Doucet, of District 'B' (p. 458, Ex. 74); and Mr. Huestis, Assistant District Engineer of District 'B' (p. 457, Ex. 79). These letters were read clause by clause, to Mr. Lumsden and admitted by him to give a substantially accurate account of what was done. (See testimony of Mr. Lumsden as to Poulin, p. 455-458; as to Doucet, p. 461-463; as to Huestis, p. 489-492).

Mr. Lumsden's evidence on this point is as follows:—

Q. Do you or do you not think that this trip furnished sufficient data, as Mr. Poulin puts it, to justify a re-classification of the work?—A. I think from what I know, if I was doing it again, I would get fuller information on the ground.

Q. Very much fuller?—A. Well, I could.

Q. If you were doing it again you would take a different procedure; you would examine the engineers more fully on the ground?—A. That is what I mean.

Q. And investigate into the reasons, for the different classifications. Anything that struck you as requiring explanation, you would ask for an explanation on the spot? Is that so?—A. To a certain extent that is so.

Q. In other words, if you were doing it again, you would conduct it or see that it was conducted somewhat more sympathetically with the work; that is to say, you would not allow the Board to maintain such a remote attitude towards those in charge of the work, and you would get more in touch with them and find out what they had been working in their minds, and what they had been doing?—A. I think it would be better if we had done so. I say that.

It is obvious that such information as Mr. Lumsden acquired on these trips was quite insufficient to justify him in losing confidence in his engineering staff, or even in subjecting them to criticism without further investigation.

There were in all, four questions upon which Mr. Lumsden says he differed from the classification of his engineers, the principal, as before stated, being in the classification of massed material, or assembled rock, as Mr. Lumsden called it in his interpretation. The blue print accompanying his interpretation, gave no dimensions, nor yet the proportion of rock or boulders necessary in the mass to constitute assembled rock; and, it is quite apparent, that there was reasonable ground for difference of opinion both as to the clauses of the specifications themselves, as shown by the radical difference between Mr. Lumsden and all the counsel and other engineers who expressed opinions upon the clauses, and also, as to the meaning of Mr. Lumsden's interpretation. Another difference of opinion was with respect to what is termed 'overbreak' or the rock displaced beyond the theoretical slopes in a cut. According to the specifications this was to be paid for, if it was caused unavoidably, but was not to be paid for if caused negligently by the use of excessive blasts. Mr. Lumsden, in common with all the engineers, admitted that a certain amount of breaking away behind and beyond the theoretical slope in rock cuttings, is quite inevitable, and that it will vary, to some extent, according to the character of the material and other circumstances. As Mr. Lumsden stated, this overbreak is a very small item indeed on District 'B' and in District 'F' if any errors in the return of solid rock have been made owing to undue allowance for overbreak, that is a matter which can be readily adjusted by engineers, and, according to the evidence of Mr. Grant, the present Chief Engineer, it is now under investigation. There is no suggestion anywhere in the evidence that any excessive overbreak had been intentionally returned.

Another item referred to in Mr. Lumsden's statement, was the return of frozen material as loose rock. Mr. Poulin, the District Engineer of District 'F,' was appointed after the time within which the contract was to have been completed and expired, and his instructions from Mr. Lumsden were to hasten the work of construction as rapidly as possible. This season of summer work was short, and certain material was returned as loose rock which had been removed while frozen solid. Mr. Lumsden, however, several times during the course of his evidence, stated that he made no charge with respect to frozen material, and notably on page 299.

There is also some question about the allowance of indurated material in borrow pits near Wabigoon as loose rock. This was reported to Mr. Lumsden by Mr. Poulin at the time of its classification, without objection from him, and the evidence appears

to establish that the classification of this material was correctly made, in accordance with engineering practice. In any event the item is small in amount.

Another ground of complaint was that the engineers had classified massed material by percentage instead of by actual measurement. In the letter of instructions of Mr. Lumsden, already referred to, of 30th January, he distinctly excepted from his order that measurements should be made in all cases where measurement was impracticable. The evidence shows that actual measurements have, in all cases, been made of the total quantities of material moved, and also, actual measurements of all ledge rock. It appears that in certain cuts the massed material occurred in very irregular formations, and it was found by the engineers impossible to measure accurately the quantities of material which should be returned as assembled rock. In such cases measurement by percentage, as authorized by Mr. Lumsden, was resorted to, and the evidence establishes that this has been the practice on other railways, and is in accordance with the best engineering methods. In fact, all the engineers examined declared upon oath that no other means of classification of such material is known to engineering science.

These questions are all questions of engineering opinion, and do not involve, in the aggregate, a very serious amount; the returns and progress estimates are all subject to revision, the Commissioners being far more than amply protected by the security held by them.

As regards the alleged over-classification of assembled rock, Mr. Gordon Grant, who has had the advantage of making a personal inspection of the road, spoke of it as a tempest in a tea-pot. (p. 510).

In view of the increase in the cost of the road, over the preliminary estimates, your committee thought it proper to inquire carefully whether this was in any appreciable degree attributable to over-classification. The first estimate, attributed to Mr. Schreiber in 1903, was previous to any surveys whatever having been made, and was simply a rough estimate of what it might probably cost to build through such a country. The later estimates of quantities printed on page 5352 of *Hansard* (March 11, 1910), contained in the first, third and fifth columns, on p. 521 of the Proceedings before this Committee, was compiled for the purpose of enabling the Commissioners to appreciate the tender of the Contractors, or, as it is commonly called, to "money-out" the tenders, and was in many cases based upon preliminary lines which were subsequently very materially changed, and which did not include a number of items entering into the cost of construction. These figures were not communicated to the Contractors tendering, but were intended solely as a guide to the Commissioners in determining which were the lowest tenders, according to the prices asked for different classes of material in each tender. As he stated above, they were based, to a considerable extent, upon preliminary lines, that is, the first projected lines of surveys. These lines were superseded by the revised location, and these again by the final location, and, as Mr. Lumsden says, even the final location was in many places changed, which he says would account for a great deal of difference in cost. The actual quantities found were in cases totally different from those estimated. There was no estimate made in these figures for train haul. Another very important item was that a large amount of side-hill work was encountered, a notable example being some twenty miles upon the St. Maurice river, where the whole side of the hill, 150 feet high, required to be removed, increasing the cost by at least four or five times the amount estimated. At La Tuque it was necessary, in order to obtain the required grade, to make a detour of some six miles. There was no estimate for carrying rock cuttings one foot below grade. In addition to these, there are several items set forth in the evidence of Mr. Doucet, pp. 532 and 533, and in the comparative statements prepared by Mr. Doucet and Mr. Poulin, filed at Ex. No. 100, p. 579. and as Exhibit No. 111, p. 657

The estimate of \$114,000,000 was subsequently compiled by Mr. Lumsden, from the reports of his Assistant Engineers, and, as appears by the evidence, was incomplete, but according to the evidence of Mr. Grant, will not be exceeded in the actual cost to any great extent. Mr. Grant says, "there will be no great difference between the actual cost and the \$114,000,000 estimate" (p. 514) exclusive of terminals and other items which were not included in the estimate.

At an early stage of the proceedings, Mr. Lumsden indicated that the only difference between him and the engineers under him, was one of professional opinion.

Mr. Lumsden was repeatedly asked whether he had any reason to suspect the good faith of the engineers acting under him, and he very frankly stated that it was merely a difference of opinion between them, and that he could not agree with their classification, but that he did not doubt their integrity and honesty of purpose. The following extracts from the evidence, given by Mr. Lumsden, shows that he withdrew all imputations against the engineers, either as to their disregard of instructions or as to any improper motives on their part. We find on page 165 he said:—

Q. I might just ask the question now that the same difference of opinion exists on District "F," between you and the District and Subordinate Engineers as on District "B" with regard to this cemented material or assembled rock?—

A. I think so.

Q. And the question on that district is, to all intents and purposes, in identically the same position as on Section "B," isn't it?—A. I think so, practically the same.

Q. Practically the same. It is a difference between you and the district and subordinate engineers, to the interpretation of that clause of the specification?—A. Yes, and of my interpretation of it.

Q. And of your interpretation of it—quite so.

By Mr. Moss:

Q. I would like to ask Mr. Lumsden if he makes any suggestion or any complaint regarding the professional capacity, integrity or ability of these engineers?—A. The professional capacity of some of the Resident Engineers I know nothing about.

Q. You make no charge?—A. I make no personal charge against any one of intentional wrong-doing.

Q. And you do not as far as Mr. Poulin is concerned?—A. No, I do not as far as Mr. Poulin is concerned.

Q. You make no charge as to his capacity or integrity, or his attention to the work?—A. No, I make no charge of that kind.

Also on page 194:—

Q. You adopted the course of resigning in a letter couched in terms as would destroy public confidence in the whole engineering staff?—A. No, I don't think so.

Q. When you need such terms as that you had lost confidence in all the staff; that is what it practically amounted to?—A. Well, in—

Q. Then you modified it by a postscript, or rather a letter the following day, that this did not apply to the whole staff. Looking at the matter now in a fair-minded way—I know it is not possible for me to put words in your mouth, or to lead you in the slightest degree—but looking at it now calmly and dispassionately, would it not have been fairer for you, in view of all that has taken place—these differences of opinion and your attention being drawn especially to the Hodgins inquiry—would it not have been fairer to these engineers to have met them and threshed the thing out, and had the thing settled, than to have such terms as placed them all under such a charge as Parliament found it immediately necessary to investigate?—A. Well, I didn't—I am sorry now that I put it in the words

I did that I had lost confidence. I put just the words that came to me at the time. I am sorry I put in the words "having lost confidence." I felt that they—I could not agree with the classification as I found it.

By Mr. Macdonald:

Q. You now regard the expression you used as somewhat unfortunate?—A.

Yes. "Having lost confidence in them" is probably somewhat unfortunate, for it reflects on them; but I did not intend to do it.

Also on page 297:—

Q. These men are the men who have suffered in their professional reputation?—A. Well, as I have said, in the outset, I withdraw that portion of it, so far as referring to their honesty and integrity in the matter is concerned.

Also on page 385, questioned as to whether he had not other reasons for resigning. Mr. Lumsden's evidence was:—

Q. Did you have any other reasons in your mind?—A. I can't say now whether I had or not.

Q. You can't say as to that, and the reasons which you did finally give were those reasons in regard to lack of confidence in your engineers, and you regret that expression as being an unfortunate one?—A. Yes, I do, and if I had to write it again I would probably put it in other terms.

Also on page 444:—

Q. Now, Mr. Lumsden, supposing that instead of adopting the course which you have seen fit to adopt, of resigning and making these suggestions against the Engineers, you had adopted the course of remaining with the Commission and endeavouring to reconstitute your staff to your satisfaction, would you, on that investigation and on that material have felt justified in dismissing Mr. Richan from the service of the Commission?—A. I didn't consider it in that way at all; I didn't—as I seemed to be disagreeing with all of them, I came to the conclusion I would resign.

Q. Though you might be wrong and you might be right?—A. Exactly; I chose to resign; at any rate, that is what I did.

Q. Of course, you involved these gentlemen; I don't want to dwell on it any longer than is necessary, or to put any more stress on it than is necessary, but you saw fit to involve these gentlemen and it is necessary they should be cleared in regard to the matter; it is fair to say you would not have undertaken on such investigation as you had made to dismiss Mr. Richan from the service of the Commissioners or to request his dismissal, would you?—A. I don't suppose I would.

Q. And in the suggestion that you made in putting in your letter of resignation in the terms in which you put it, you did not intend to suggest that he was incompetent or unfit to continue the work he was doing then?—A. I merely said, at least I don't know what I originally said, but in my explanation at the commencement of this investigation I said it was simply a matter of not agreeing with the classification; it wasn't a matter of losing confidence in their honesty nor their integrity.

It is to be regretted that Mr. Lumsden did not go earlier upon the work himself and visit it more frequently. Had he done so, it is possible that any question arising in regard to classification would have been immediately and satisfactorily adjusted; and, when any difference arose, your committee are of the opinion that it was Mr. Lumsden's duty as Chief Engineer to have immediately taken steps to have the difference settled, and if any portion of the staff refused to conform to his instructions, to have recommended their dismissal to the Board of Commissioners. The District Engineers, Mr. Doucet and Mr. Poulin, both engineers of large experience and of high standing in their profession, stated that they were thoroughly familiar with the classification, returned from their respective districts, and expressed their complete satis-

faction with the engineers under them, and assumed complete responsibility for the work in their districts. As a consequence, it appeared to the committee that no further information that would be of assistance to them would be obtained by calling any engineers in addition to those whose evidence was taken.

Your Committee beg to submit herewith to the House all the evidence taken before us to date for their information, and to report that, in our opinion, Mr. Lumsden's charge of general disregard of his instructions, has not been sustained, and no evidence has been adduced which, in our opinion, would justify him in stating that he had lost confidence in the portion of the engineering staff referred to by him.

The Committee beg to submit to the House such further or other reports as may be necessary.

Mr. Brown, from the Select Standing Committee on Miscellaneous Private Bills, presented to the House, the Fourteenth Report of the said Committee, which is as follows:—

Your Committee have considered the Bill, from the Senate, intituled: "An Act to incorporate the Ottawa and Montreal Power and Transmission Company, Limited," and have agreed to report the same with Amendments.

Mr. Speaker informed the House that the Clerk had laid on the Table,—recommendations respecting the organization of the Sergeant-at-Arms Branch of the Staff of the House of Commons, which are as follows:—

CIVIL SERVICE AMENDMENT ACT.

To the Honourable

The House of Commons.

I have the honour to recommend that the organization of the Staff of the House of Commons (Sergeant-at-Arms Branch) be amended by cancelling the divisional classification attached to the positions of the following employees:—

The Superintendent of the Messenger Service and Housekeeper, (Mr. Dube).

The Assistant Superintendent of the Messenger Service and Assistant Housekeeper, (Mr. Connolly), and

The Steward of the Joint Restaurant and Speaker's Steward, (Mr. George).

For the reasons furnished in the report of the Clerk of the House hereto appended.

The said change not to affect the present salaries of the said employees.

CHARLES MARCIL,

Speaker.

OTTAWA, April 27th, 1910.

The Honourable

The Speaker of the House of Commons.

SIR,—In reference to the organization of the Staff of the House of Commons (Sergeant-at-Arms Branch), I beg to say that last June the Auditor General called my attention to what he conceived to be erroneous interpretation of the Civil Service Amendment Act whereby, in the said organization, the Superintendent of the Messenger Service and Housekeeper (Mr. Dube), the Assistant Superintendent of the Messenger Service and Assistant Housekeeper (Mr. Connolly), and the Steward of the Joint Restaurant and Speaker's Steward (Mr. George), were classified as in certain "Divisions" therein mentioned. The Auditor General expressed the opinion that such divisional classification was without warrant of the said Act.

I first questioned the Auditor General's view; but a similar question having arisen in connection with employess of the same class in the Senate, and the same objections having been taken by the Auditor General in that case, the subject was

referred to the Department of Justice. That Department upheld the Auditor General's contention.

Consequently, I beg to recommend that the said organization, with reference to these employees, be changed to harmonize with the decision of the Justice Department, viz.: by omitting the divisional classification in these cases.

This change is not to affect the present salaries of the said employees.

I have the honour to be, sir,

Your obedient servant,

THOS. B. FLINT,

Clerk of the House.

On motion of Mr. Sinclair, seconded by Mr. Macdonald,

Ordered, That the Eighth Report of the Select Standing Committee on Marine and Fisheries, be now considered.

Mr. Speaker acquainted the House, That a Message had been brought from the Senate by their Clerk, as followeth:—

The Senate have passed the following Bill, without any amendment, viz.:—

Bill to amend the Post Office Act.

Also, a Message with the following Bills of their own, to which they desire the concurrence of this House:—

Bill intituled: "An Act for the relief of Emily Maud Nicoll."

Bill intituled: "An Act for the relief of Edna Shibley De Mar."

Bill intituled: "An Act for the relief of Clifford Buell Lillie," and

Bill intituled: "An Act for the relief of Roland James Botterill."

And also, Messages communicating the Evidence taken before the Standing Committee on Divorce, to whom were referred the Petitions of Emily Maud Nicoll, Edna Shibley De Mar, Clifford Buell Lillie and Roland James Botterill, respectively; praying for Bills of Divorce, and the papers produced in evidence before them, with the request that the same be returned to the Senate.

Mr. Guthrie, from the Select Standing Committee on Railways, Canals and Telegraph Lines, presented to the House the Twenty-eighth Report of the said Committee, which is as follows:—

Your Committee have had under consideration the following Bills, from the Senate, and have agreed to report the same, without amendment, viz.:—

Bill intituled: "An Act respecting the Brandon, Saskatchewan and Hudson's Bay Railway Company"; and

Bill intituled: "An Act respecting the Alberta and British Columbia Railway Company."

Your Committee have also considered the following Bills, from the Senate, and have agreed to report the same, with Amendments, viz.:—

Bill intituled: "An Act respecting the Essex Terminal Railway Company"; and

Bill intituled: "An Act to incorporate the Buctouche Railway and Transportation Company."

Mr. Fielding moved, seconded by Mr. Paterson, That the House do, To-morrow, resolve itself into a Committee of the Whole, to consider certain proposed additions to Clause One of the Resolutions for "Subsidies to Railways," already submitted to the House.

Mr. Fielding, a Member of the King's Privy Council, then acquainted The House, That His Excellency the Governor General having been informed of the subject-

matter of the said proposed additions, recommends them to the consideration of the House.

Resolved, That this House will, To-morrow, resolve itself into the said Committee.

Mr. Fielding moved, seconded by Mr. Paterson, That this House will, To-morrow, resolve itself into a Committee of the Whole to consider a certain proposed Resolution respecting the granting of aid towards the maintenance of an independent and efficient service of telegraphic news from Great Britain, for publication in the Canadian Press.

Mr. Fielding, a Member of the King's Privy Council, then acquainted the House, That His Excellency the Governor General, having been informed of the subject-matter of this Motion, recommends it to the consideration of the House.

Resolved, That this House will, To-morrow, resolve itself into the said Committee.

The Order of the Day being read, for the House again in the Committee of Supply.

Mr. Fielding moved, seconded by Mr. Paterson, and the Question being proposed, That Mr. Speaker do now leave the Chair;

Mr. Lennox moved, in amendment thereto, seconded by Mr. Blain, That all the words after " That " to the end of the motion be left out, and the following substituted therefor:—

1. That in the debate upon the proposed construction of the National Transcontinental Railway, in 1903 and 1904, the Prime Minister and other Members of the Government declared that they had gone thoroughly into the whole question, and were in possession of abundant expert and general information as to the character of the country through which the road would be built; that "for three-fourths of the distance between Quebec and Winnipeg the line would be run over a level plateau, over which the construction of a railway was almost as feasible as over the prairies"; that the Government were then competent to correctly judge as to the extent of the undertaking and its cost; that delay for investigation was unnecessary and inexpedient, and that they had definitely ascertained that the total cost to Canada would not exceed \$13,000,000.

2. That the Minister of Finance, in the session of 1903, expressly professing to speak upon reliable information from competent expert authorities, declared to Parliament that the actual cost of the Eastern Division would amount to no more than \$51,300,000, or, including interest during construction, to the sum of \$54,609,676; and, moreover, that with a grade of $\frac{1}{10}$ of 1 per cent, about 21 feet to a mile, and construction according to the highest known standards, the cost, without interest, would not exceed \$61,640,000, or an average of \$34,170 per mile.

3. According to official returns, since laid upon the Table of the House, this Eastern Division, without counting anything for interest, and with many items of construction as yet not included, will cost not less than \$154,000,000, or an average of more than \$85,000 per mile.

4. But, according to these official returns and statements of Ministers, the total cost of the Eastern Division will actually amount to not less than the sum of \$218,467,314, made up as follows:—

Payments under 21 contracts.	\$104,530,905
$\frac{1}{10}$ share of the cost of the Quebec bridges.	7,594,091
Terminals at Quebec.	2,000,000
Share of terminals at Winnipeg.	1,156,252
Share of shops at Moncton.	750,000

Share of terminal yards at Moncton..	97,000
Numerous items (not covered by contracts), as per statement recently furnished by the Government..	37,797,852
<hr/>	
Total, exclusive of interest..	\$153,926,100
Interest on outlay during one-half period of construction, that is, average of four years' simple interest, at 3½ per cent..	21,549,654
<hr/>	
Cost at time road to be handed over to Company.. . .	\$175,475,754
Add interest, at 3½ per cent for seven years, after road handed over, during which country is to bear the charge..	42,991,560
<hr/>	
Total at end of 7-year period..	\$218,467,314
<hr/>	

Making an average expenditure of more than \$120,000 a mile, and representing a fixed annual charge of \$6,554,020.

5. To this cost of construction, and to interest account, must be added very large sums for entry into Winnipeg, for locomotive accommodation there; also, for additional terminal requirements at Moncton and at other points, and for further probable interest charges.

6. According to the estimates upon which the contracts were awarded for the Eastern Division, rock excavation was to cost \$23,322,976, whereas, according to the official returns now brought down, the cost of such rock excavation alone upon that Division, will be not less than \$52,000,000, a sum exceeding the Finance Minister's estimated full cost of the complete construction of this part of the road; and, in many cases, the Contractor is being paid for rock work alone more than he was supposed to be entitled to be paid for fully completing all work upon his section.

7. Taking the interest account alone, computed on the actuarial basis adopted by the Minister of Finance, and granting that the Company may take over the road and pay the stipulated rental, and leaving out of account our annual loss on the difference between the rate of rent received and the rate of interest paid out for forty-three years, Canada will be out of pocket, in actual cash, an amount more than four times as great as the amount stated to Parliament as the cost to Canada for the purpose of inducing Parliament to approve and pass the Transcontinental legislation.

8. That having regard to the astounding and unexplained increase in the cost of the said railway, it is absolutely essential, in the public interest, that there should be a broad and thorough investigation into all matters connected with the building of the Eastern Division of the Transcontinental Railway.

9. Therefore, this House is of opinion that a Royal Commission, consisting of not less than three competent persons, should be appointed to make inquiry into and concerning all the facts and circumstances connected with the inception of the Transcontinental Railway project and undertaking, the conduct and efficiency of the various persons acting for the Government or the country, the mode in which the work has been carried on, both from an engineering and financial point of view, the manner in which the Commissioners and the various officials and employees have discharged their duties, the manner in which contracts have been entered into and executed, accounts verified and payments made from time to time, and generally, an inquiry into all facts and circumstances relating to or affecting the public interest in regard to the undertaking, with all powers usual in such cases, including those provided for in an Act respecting Inquiries into Public Matters.

10. That this House is also of opinion that the Government should take immediate and effective action to investigate the danger of diversion of Canadian traffic to foreign ports and to prevent any such diversion.

And the Question being put on the amendment; the House divided; and the names being called for, they were taken down, as follow:—

Mr. Bickerdike, from the Joint Committee of both Houses on the Printing of Parliament, presented to the House the Third Report of the said Committee, which is as follows:—

The Committee recommend:—

That in the event of there being no further meetings of the Committee, the Joint Chairman may decide as to the printing or otherwise of any document that may be submitted to either House, and generally, to act until the end of the Session, in all other matters that come properly within cognizance of this Committee.

Mr. Speaker informed the House that the Clerk had laid on the Table a recommendation relative to the promotion of Mr. F. Chadwick, Deputy Clerk of the Crown in Chancery, from sub-division B to sub-division A in the Second Division, on the staff of the House of Commons, which is as follows:—

CIVIL SERVICE AMENDMENT ACT, 1908.

To the Honourable,

The House of Commons.

I have the honour to recommend that the Deputy Clerkship of the Crown in Chancery, in the organization of the Staff of the House of Commons, be raised from the Second Division sub-division B in classification to the Second Division, sub-division A; and that the incumbent of that office Mr. F. Chadwick, be promoted in grade accordingly.

Hereto is appended the report of the Clerk of the House on this subject.

CHARLES MARCIL,

Speaker.

April 30th, 1910.

To the Honourable,

The Speaker of the House of Commons.

SIR,—In the Organization and Classification of the Staff of the House of Commons, adopted on the 10th May, 1909, the Deputy Clerkship of the Crown in Chancery was graded in the 2nd Division, subdivision B.

It was intended before the Civil Service Amendment Act came into force, to place this Clerkship in the grade which would have placed the incumbent in the 2nd Division, Sub-division A. But, owing to the fact that the Chancery Office had only at that time been transferred from the Department of the Privy Council to the House of Commons, Mr. Chadwick's proper claims to the promotion were overlooked, and it is desirable to promote the Clerkship commensurate with its importance and responsibility.

I, therefore, recommend that the Deputy Clerkship of the Crown in Chancery be graded as in 2nd Division, sub-division A, and that the Organization of that Branch be amended accordingly, and that Mr. Chadwick, the incumbent of the office, whose zeal and industry as well as ability and experience are highly appreciated, be promoted to the said grade.

Mr. Chadwick has received the Certificate of Qualification in the usual form from the Civil Service Commission.

I have the honour to be, Sir

Your obedient servant,

THOS B. FLINT.

Clerk of the House.

30th April, 1910.

To His Excellency the Right Honourable Sir Albert Henry George, Earl Grey, Viscount Howick, Baron Grey of Howick, in the County of Northumberland, in the Peerage of the United Kingdom, One of His Majesty's Honourable Privy Council, and a Baronet; Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Knight Grand Cross of the Royal Victorian Order, &c., &c., Governor General and Commander-in-Chief of the Dominion of Canada.

MAY IT PLEASE YOUR EXCELLENCY:

We, His Majesty's dutiful and loyal subjects the Commons of Canada in Parliament assembled, beg leave to convey to Your Excellency an expression of the general feeling of regret with which all classes in this country have learned that your official connection with Canada is soon to cease.

It must be a source of gratification to Your Excellency, on your retirement from the high office of Governor General, to realize that the period of your administration has been characterized by general and increasing prosperity in every portion of the Dominion.

The zeal with which Your Excellency has sought, by personal observation, to gain an intimate knowledge of the character, possibilities and requirements of every section of the country, has been highly appreciated by the people of Canada.

The special interest which Your Excellency has taken in everything calculated to foster a high sense of public duty and responsibility, to stimulate intellectual development and to advance science and art, will long be gratefully remembered; while the success of your endeavours in cultivating the growth of a Canadian spirit has strengthened us in the belief that the full development of our national life is compatible with the closest and most loyal connection with the Empire. The National Park established at Quebec, on the Plains of Abraham, will remain as an enduring monument to Your Excellency's wise and enlightened efforts to this end.

We beg that Your Excellency will express to the King our loyal attachment to His Majesty's Throne and Person, and our united resolve to accomplish our part in the maintenance and upbuilding of His Majesty's Empire.

In saying farewell to Your Excellency and family, we cannot refrain from expressing our appreciation of the important and gracious part taken by Her Ex-

cellency the Countess of Grey in the success which has marked the discharge of your high responsibilities and labours; the helpful, generous and sympathetic co-operation afforded by Her Excellency and by your daughters, Lady Sybil and Lady Evelyn, in the performance of our public and social duties, has won for them an enduring place in the affection and respect of the Canadian people.

In conclusion, we beg to assure Your Excellency that you will always have our warmest wishes for the future happiness of yourself and family.

The third clause of the Bill, as it passed the Commons, contained a proviso, intended to protect the public interests, to the effect that no such lease should have any force or effect until the Government Railways Managing Board and the Chief Engineer of the Department of Railways and Canals, should have approved the terms and conditions of such lease, and until the Parliament of Canada had first ratified such lease. The amendment made by the Senate proposed to further protect the public interests, by enacting that certain further information necessary to enable Parliament to form an intelligent opinion, should be submitted to Parliament before the ratification of any such lease.

The Honourable the Senate, having sent a Message to this House, agreeing to the Bill intituled: "An Act to authorize the Government of Canada to acquire by "lease, lines of railway with the Government railways," with an Amendment, which is as follows:—

Page 2, line 3.—After "lease" insert the following as clause 4:—

"4. No such lease shall be ratified by parliament unless a return has been laid before both Houses for at least one month showing:—

(a) The cost of the road proposed to be leased, together with the amount of stock subscribed and all moneys received from sale of bonds or by way of bonuses or otherwise;

(b) present equipment of road; together with the average rate of freight and charges for passengers on the same and a statement showing, approximately, how above rates compare with those charged on the Intercolonial Railway.

(c) present condition of the road and the estimate of outlay required to put it in good running order;

(d) total receipts and expenses for three years last past;

(e) list of shareholders and bondholders;

(f) other creditors of the road;

(g) estimates of future receipts and expenditures, in the event of the road being leased by the Intercolonial Railway;

Such return to be signed and certified to by the Chief Engineer and Traffic Manager of the Intercolonial Railway and the Deputy Minister.

And this House, having taken the said Amendment into consideration, it was resolved: "That the said Amendment be disagreed to, for the following reason:—

Because the said amendment unnecessarily and ineffectually attempts to limit the power of future Parliaments."

A Message having been sent to the Senate to acquaint their Honours therewith, and the Senate having sent a further Message to this House, informing this House that their Honours adhere to the said Amendment.

And this House, being of the opinion that if a conference is held between the two Houses, it is possible that an agreement may be arrived at, in respect to the said Bill which result, it is, in the opinion of this House, desirable to attain if possible.

Therefore, on motion of Mr. Graham, seconded by Mr. Pugsley,

Resolved, That a Message be sent to the Senate respectfully requesting a free conference with their Honours, to consider the said Bill and any amendment which, at such conference, it may be considered desirable to make thereto.

Ordered, That the Clerk do carry the said Message to the Senate.

On motion of Mr. Macdonald, seconded by Mr. Harty,

Ordered, That in accordance with the recommendation contained in the Sixth Report of the Special Committee, *re* Luusden inquiry, proper fees and expenses be paid to counsel appearing before the said Committee, and the Clerk of the House and the Law Clerk are hereby authorized to tax the said fees and expenses and to pay the same, when so taxed, out of any moneys voted by Parliament for the expenses of Committees.

Mr. King, from the Special Committee to whom was referred Bill respecting Hours of Labour on Public Works, presented to the House the Fourth Report of the said Committee, which is as follows:—

Your Committee, since its appointment on the 9th day of December, 1909, has held 19 meetings, all of which were open to the public, and heard a large number of witnesses, representing interests specially affected by the proposed legislation. The Dominion Trades and Labour Congress and the Canadian Manufacturers' Association were represented by their respective secretaries, each of whom presented the views of the members of these bodies, in carefully prepared and comprehensive memorial. The views of the Shipping Federation of Canada were given by its secretary. Individual employers of labour and leading trade union officials, representing special industries and trades in different parts of Canada, gave testimony from the point of view of labour and capital, respectively, whilst information of an official nature as well as expressions of opinion were obtained from the Fair Wages Officers of the Department of Labour, Ottawa, the Secretary of the Ontario Bureau of Labour, Toronto, and the Chief Factory Inspector of the Province of Quebec. An exhaustive analysis of the nature and administration of the legislation of other countries, respecting the hours of labour on public works, was given by Professor Skelton, of Queen's University.

2. In addition to the evidence of witnesses, your Committee obtained by correspondence, in reply to 3,600 communications sent out, expressions of opinion from 721 different persons. Of the replies received, approximately, 80 per cent contain valuable suggestions and arguments respecting the Bill. Of these replies 304 were from officers of labour unions; 302 from manufacturers, including the Employers' Association of Toronto; 65 from Farmers' Institutes and the Dominion Grange; 39 from Boards of Trades, and 11 from transportation companies, including the Marine Association.

3. The evidence taken, together with the proceedings of your Committee, but not including communications sent or received, covers some 400 pages of printed matter.

4. Owing to the number of persons who expressed a desire to give testimony, your Committee has been obliged to continue its sittings for the taking of evidence up to

the present time, but notwithstanding, has been unable to hear all persons who have asked to be allowed to give testimony. Owing to the volume of evidence taken, your Committee has not had opportunity of giving to the evidence and the large number of communications which have been received, the careful consideration which their importance demands. Your Committee think that the communications should be carefully classified, and together with the evidence, duly printed, and rendered available for distribution, in order that the Members of the House of Commons and of the Senate and those who may be especially interested in or affected by the proposed legislation, may have an opportunity of becoming fully informed on the many important bearings of the proposed measure.

5. Your Committee, therefore, recommends that the Clerk of the Committee be directed to classify the correspondence which has been received, and prepare an index in detail of the evidence and correspondence; also, that Rule 72 of the House be suspended, and that the reports of your Committee, the proceedings, evidence and communications be printed in one volume, available for distribution to the number of 5,000 copies in English, and 1,000 copies in French.

6. Your Committee also recommends that the reports, proceedings, evidence and correspondence be printed as an appendix to the Journals.

(For the Evidence, &c., see Appendix No. 4 to the Journals.)

On motion of Mr. King, seconded by Mr. Bureau,

Resolved, That this House doth concur in the recommendations contained in the Fourth Report of the Special Committee on Bill respecting the Hours of Labour on Public Works, presented this day.

Mr. Fielding moved, seconded by Mr. Paterson, That the recommendations of the Honourable the Speaker, laid on the Table of the House on the 24th November, 1909, relative to the yearly increase in salary to certain officers and clerks of the House, pursuant to Section 37 of the Civil Service Amendment Act, 1908, be approved.

“MAY IT PLEASE YOUR EXCELLENCY:

“The Commons of Canada have voted the Supplies required to enable the Government to defray the expenses of the Public Service.

“In the name of the Commons, I present to Your Excellency a Bill intituled: An Act for granting to His Majesty certain sums of money for the public service of the financial year ending 31st March, 1911, to which I humbly request Your Excellency's assent.”

To this Bill the Royal Assent was signified in the following words:—

“In His Majesty's name, His Excellency the Governor General thanks His Loyal Subjects, accepts their benevolence, and assents to this Bill.”

After which His Excellency was pleased to deliver the following Speech to both Houses:—

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

I am glad to relieve you from further attendance in Parliament, after a Session which has been marked by legislation of the most important character.

The measure for the establishment of a naval service, which has become of pressing necessity, in view of the extraordinary advance, within recent years, of Canada as a nation within the British Empire, is the crowning development of a policy which was anticipated from the earliest days of Confederation.

The Act to amend the law respecting the Aid to Dry Docks will, it is believed, lead to the early construction of docks capable of receiving the largest warships, and thus assist the movement for naval defence.

The Act making provision for the lease of lines connecting with the Intercolonial Railway, and for their operation as a part of the system of Government Railways, will enlarge the sphere of usefulness of the Intercolonial, and tend to increase the development and prosperity of an important section of the Dominion.

The appointment of a Commission to inquire into the needs and present equipment of the Dominion, as respects industrial training and technical education, should prove an important contribution to the work of the Provinces in advancing the industrial development of Canada and the welfare of its working classes.

The measure to revise and amend the Insurance Act, which engaged the attention of Parliament in the previous session, has now been completed and is likely to prove an effective and satisfactory law.

The amendments made to the Currency Act, with special reference to the production of a Canadian gold coinage, at the Ottawa Branch of the Royal Mint, marks another step in the advance of Canada.

The arrangement lately made between the United States and Canada, averting a threatened tariff conflict and opening the way for negotiations which give promise of further improvement in the commercial relations of the two countries, has, I am glad to know, given much satisfaction to the people on both sides of the boundary line.

Equally gratifying is the termination of the long standing tariff dispute with Germany, upon terms which fully recognize the important principle for which Canada contended, and which encourage the expectation of an extended and mutually beneficial trade, between the German Empire and the Dominion.

The Act for the investigation of Combines, Monopolies, Trusts and Mergers, will, it is hoped, without injuriously interfering with commercial and industrial enterprises, effectively protect the public against attempts to restrain trade unduly.

Gentlemen of the House of Commons:

I thank you, in His Majesty's name, for the liberal provision you have made for the public service.

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

My official connection with Canada is drawing to a close. My interest in it, however, will not be severed. I shall continue to watch its progress and development, with the sincere hope and belief that, under God's providence, it will ever increasingly prosper.

Then the Honourable the Speaker of the Senate said:—

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

It is His Excellency the Governor General's will and pleasure, that this Parliament be prorogued until Monday, the 13th day of June next, to be here holden, and this Parliament is accordingly prorogued until the 13th day of June next.
